Protection in brand-safe, vetted inventory

Serve ads on Microsoft sites and a strictly vetted partner network, with ongoing quality reviews and granular placement controls, so your ads appear only in trusted environments.

Brand protection

- Strict **standards for publishers** to keep your brand safe.
- Ongoing reviews to block pages deemed unsafe—including with our proprietary **large language models**.
- **Reporting transparency and controls** to manage where your brand appears.

IAS integration

- Platform-wide protection with IAS pre-bid integration to filter out high and moderate risk inventory.
- Independent reports from IAS measurement to verify viewability, invalid traffic, and brand safety.

Future-proofed

- Massive reach across properties, with logged-in, identifiable users you won't find anywhere else—so you can continue to find your audience here as it gets harder and more expensive elsewhere.

AI that **drives** outcomes throughout the customer journey

Deliver measurable results with AI-driven targeting, personalization, and creative optimization—with unique capabilities that move customers from discovery to conversion.

Find your ideal customers at the right moment

Use Microsoft's AI and audience intelligence to find users who are actively exploring, considering, or ready to act, powered by 20+ billion daily signals.

Billions of **first-party audience signals** from Microsoft's massive consumer properties.

Powerful, deterministic data built from **search intent, web activity, profile data**, and more.

Unique audience data that only Microsoft can provide – powered by Microsoft AI.

Re-engage audiences with impression-based remarketing

Target people who've seen your ads, even if they haven't clicked, with sequential messaging that guides them from initial interest to conversion.

Olivia is in-market for a birthday gift...

Olivia is searching on Bing for flowers. She sees your ad, but clicks on a competitor.

Olivia is placed in your impression-based remarketing list.

The next day, she visits MSN and sees your ad, keeping your brand top of mind.

Later, while checking emails, she sees your ad, clicks, and visits your site.

Olivia chooses to buy flowers from your company and checks out on your site.

s.Oliver Case Study

By combining festive storytelling with impression-based remarketing, s.Oliver turned passive ad viewers into active customers.

Impression-based remarketing helped this German retailer to achieve:

50x higher CTR compared to other video platforms.

27% conversion rate for impression-based remarketing lists.

10% lower CPM compared to other video platforms.

"Impression-based remarketing lists have helped us to clearly connect the reach in the upper funnel with the performance in the lower funnel!"

This is why Microsoft Advertising's full-funnel solutions are now a cornerstone of our brand strategy".
