LinkedIn profile targeting

UNIQUE TO MICROSOFT ADVERTISING

Microsoft Advertising is the only digital advertising platform (outside of LinkedIn) to offer LinkedIn profile targeting.

HIGHLY RELEVANT AUDIENCES

More-targeted audiences allow you to bid boost more precisely, helping you achieve your return on ad spend goals.

QUICK AND EASY TO USE

Familiar campaign creation and management tools make it easy to set up your LinkedIn profile targeting in minutes.

In-market audiences

Reach an audience in-market for and ready to purchase B2B products.

Increase conversions

Reach curated audiences who are more likely to convert in your category.

Improve bids and targeting

Set up your ad group to either be exclusive to an audience on a curated list or available to everyone but with a bid adjustment for your targeted audience, similar to remarketing lists.

Simple to set up

In-market Audiences are simple to set up and don't require a Universal Event Tracking (UET) tag.

Here's an example of some of our B2B in-market audiences.

Customer Match from Microsoft Advertising

Target high-value customers using your first-party data

Boosted performance

Use your complete user understanding, including offline data, to retarget customers who are more likely to convert.

Flexibility and control over your own customer data

You decide how to use your own first-party data—build and modify any number of lists to help you reach your business goals.

Streamlined management

Use your existing segmentation and Customer match lists by uploading them to your Microsoft Advertising account!

*Only email addresses are supported for creating Customer Match lists at this time.

Customize your lists to reach your goals

You can build any number of lists based on what's important to you, including:

- Recent purchasers
- Top spenders on a particular product line
- Greatest lifetime value
- Loyalty program members
- Newsletter subscribers
- Credit card holders

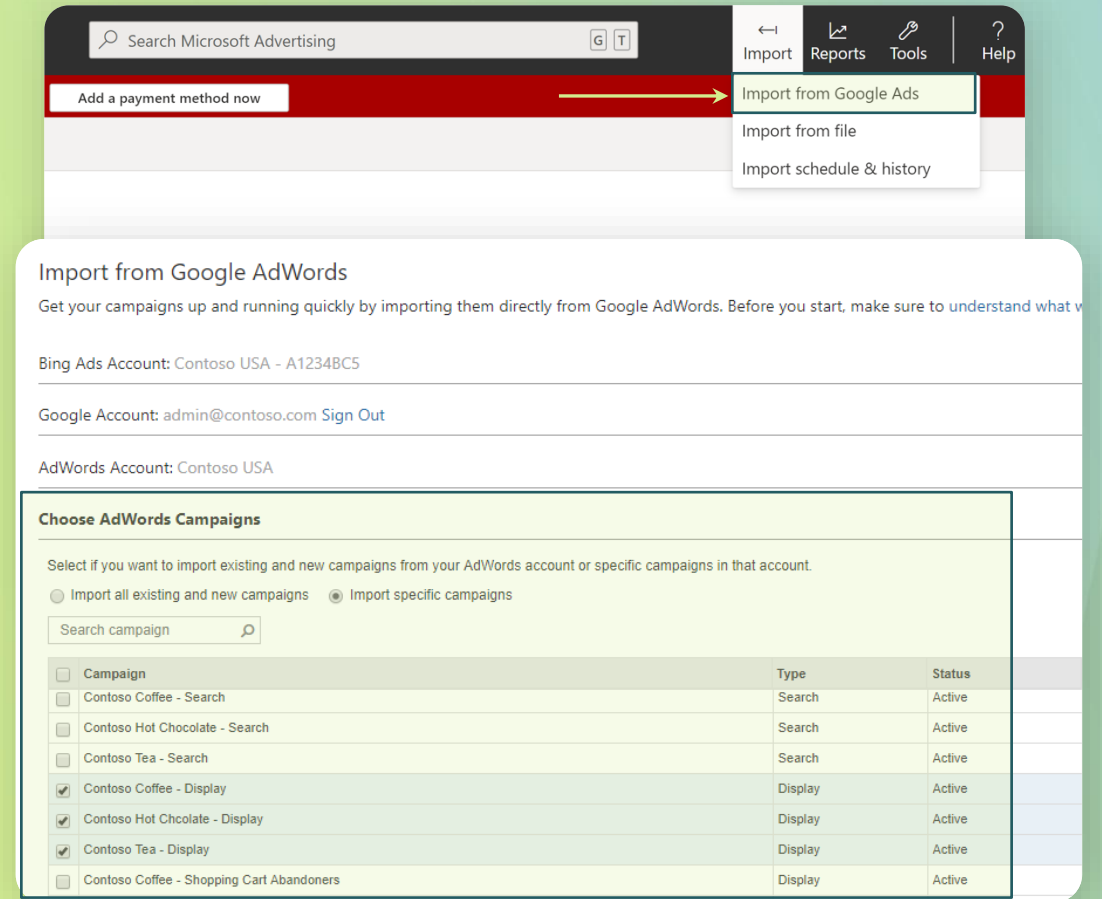

With Customer Match, use the email addresses* your customers have shared with you to reengage with them across the Search ads and Audience ads.

Import audiences with Google Import

A powerful tool designed for scale

With just a few clicks, you can both import **and** automate your audience targeting strategies across Microsoft Advertising by **scheduling imports** from your campaigns in Google Ads **and** the Google Display Network (GDN).

- 01 How many audiences are you missing in Microsoft Advertising that you have in Google Ads?
- 02 How much might it impact your ROAS or CPA if you're **not** using these audiences in Microsoft Advertising?
- 03 If you want those audiences in Microsoft Advertising, how much time would it take for you to set them up individually?

Microsoft Internal Data, 2023. Results may vary for each advertiser based on campaign settings, targeted audiences, and other factors. Lift metrics represent an average of all advertisers with completed lift studies to date. These advertisers may be a non-representative sample of all advertisers on the marketplace. Lift measured between exposed users and a control group of eligible unexposed users, with lift represented on a per-user basis. Average user count per advertiser study = 1.6M. Rounded to whole number. Compared to users who were not exposed.
