Display ads with Microsoft Advertising

Drive brand awareness

Reach up to 1 billion customers and grow your brand across Microsoft properties through engaging ads – now in more surface areas across display placements.

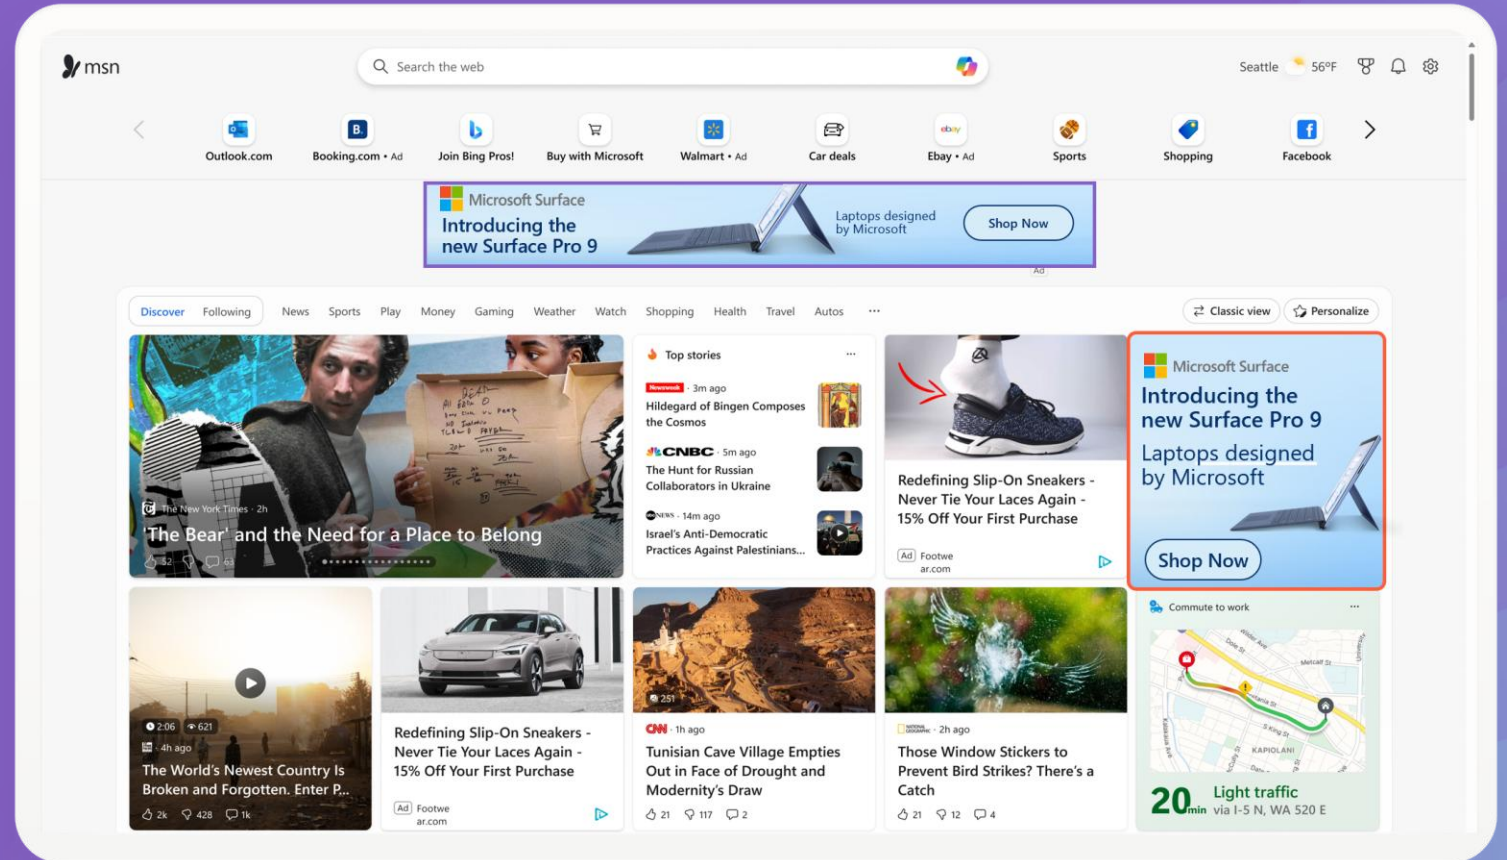

Engage the right audience

Engage a high-intent audience leveraging Microsoft's unique audience intelligence and full suite of targeting capabilities.

Control your message

Build and upload your own image ads with more creative control over how your brand is presented.

Showcase
your brand at
its best – with
beautiful
display
placements

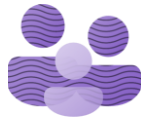

The Microsoft advantage

Supply from one of the **largest programmatic marketplaces** to meet your media buying needs

Scaled opportunities without compromising quality

Showcase your brand on premium publishers in brand-safe environments

Target highly qualified audiences

With Microsoft's unique audience intelligence, you can drive awareness with the right audiences

Designed for ease of use

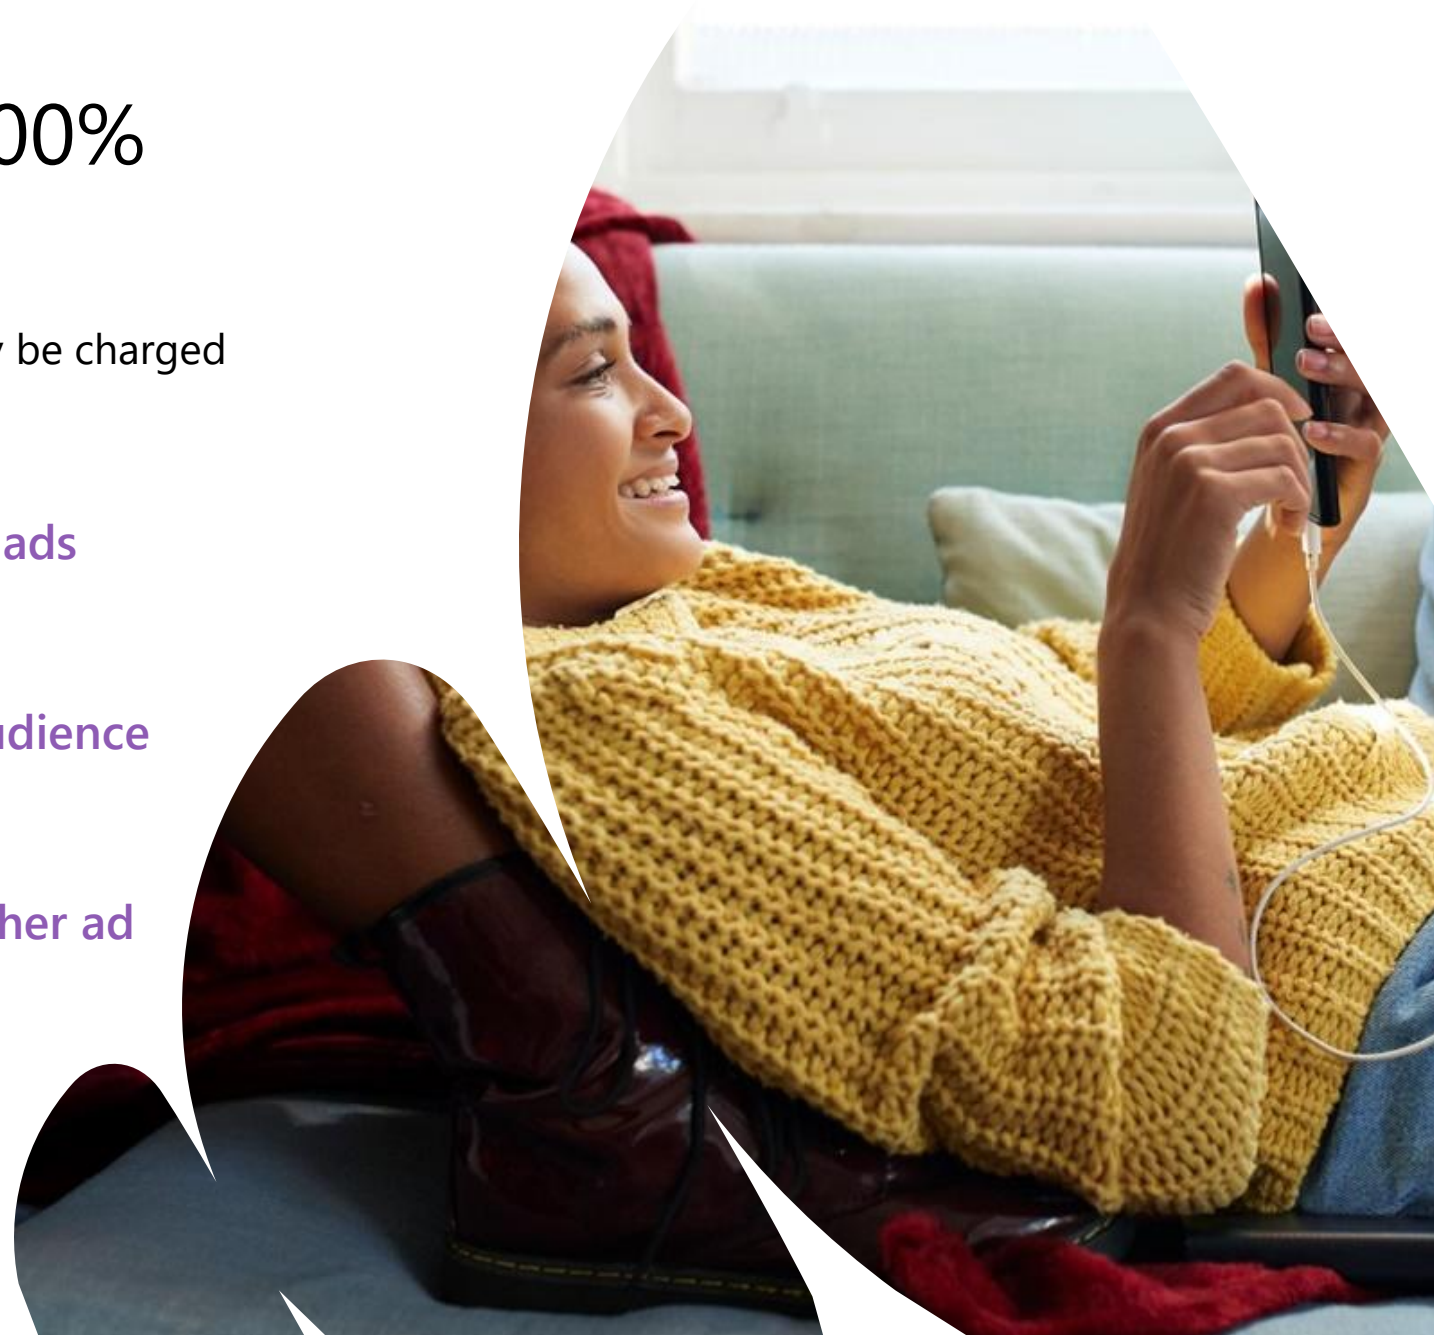

Easy access to inventory with more direct and turnkey activation

Maximize ad impact with 100% viewable impressions

With display ads in Microsoft Advertising, you will only be charged for viewable impressions*

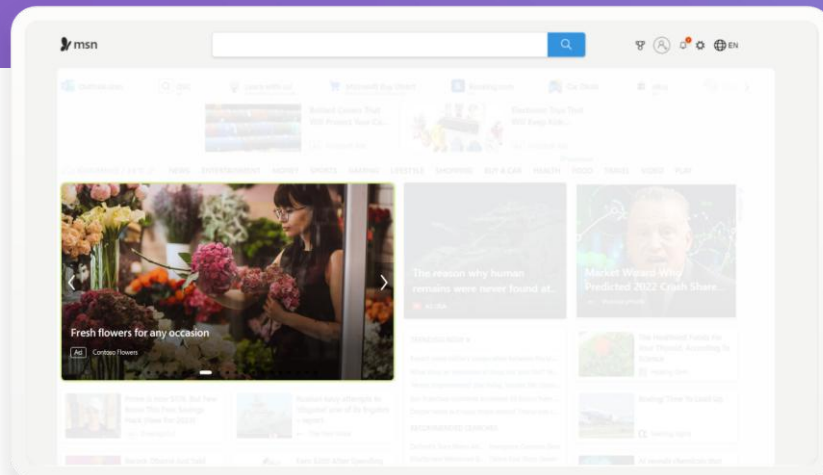

- ✚ Guarantee no wasted ad spend on hidden ads
- ✚ Ensure your ads are seen by your target audience
- ✚ Drive impact with your ad and achieve higher ad engagement

*For display ads, viewability is defined as at least 50% of the ad's pixels must be in view for a minimum of one second.

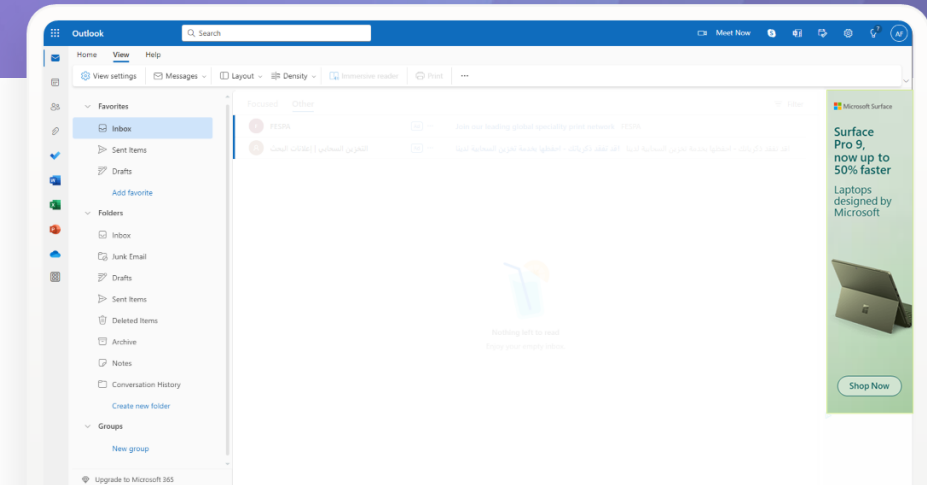

Outperform your competitors

Our click-through rates (CTR) outperform other platforms delivering on the same properties

MSN

1.4x CTR¹

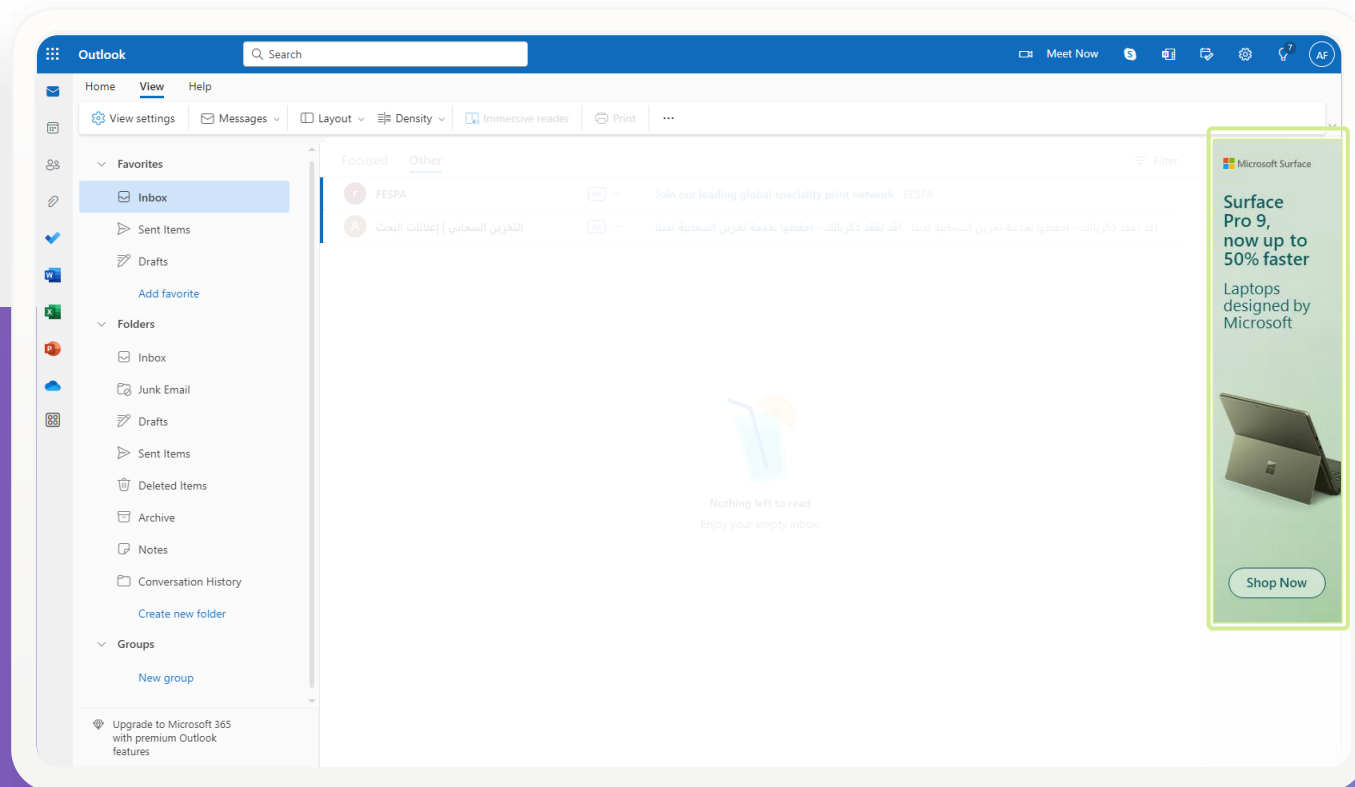

OUTLOOK

3.4x CTR²

1. Microsoft internal data, July-December 2023. Audience ad vs other demand on MSN infopane and Outlook.

Ad formats that drive engagement

Focus on driving great ad experiences and results will follow

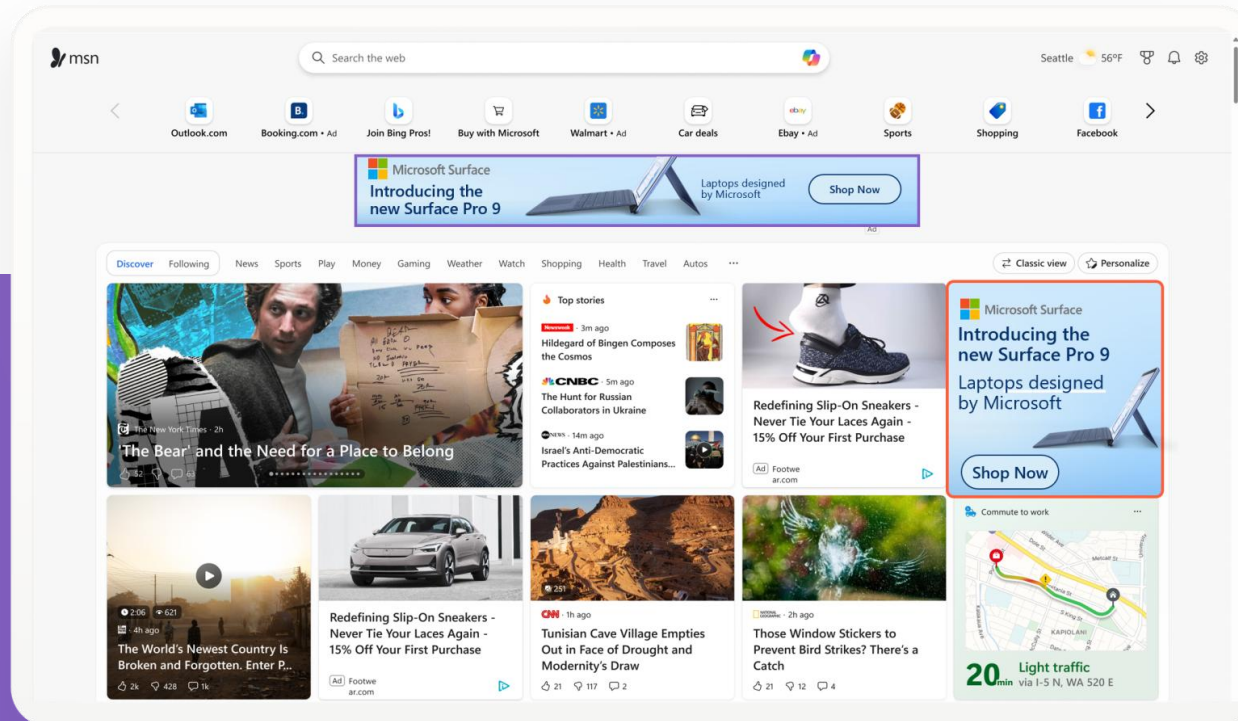

Ad performance

Display ads in outlook drive **higher engagement** with an average **CTR of 2.6%***

Ad formats that drive engagement

Focus on driving great ad experiences and results will follow

Ad performance

Right rail ads, such as 300x600 on MSN drive **3x higher click-through rates** than other ad formats

Connect with your audience in more places, formats, and devices across their online journey

What's coming next:

Full-funnel

We're moving towards a full-funnel approach, so you can meet any goal – brand awareness to performance – through your display ads.

Ease of use

We will be making improvements to how you set up and manage your assets and campaigns, that will make campaign management easier for you.

Display ads

Setup guide

Prepare your display assets

Below is a list of the display assets that you can use on Microsoft Advertising. Create three or more display ads with different aspect ratios in your campaign or ad group to help maximize performance.

Top volume ad sizes

	Name	Dimensions
PC / Tablet	Medium Rectangle	300 x 250
	Half Page	300 x 600
	Leaderboard	728 x 90
	Wide skyscraper	160 x 600
	Billboard	970 x 250
Mobile	Leaderboard	320 x 50

We recommend using display creative that aligns with [IAB advertising creative guidelines](#). Do not try to manipulate images to fit a particular size. Create a separate image for each size for the best ad rendering.

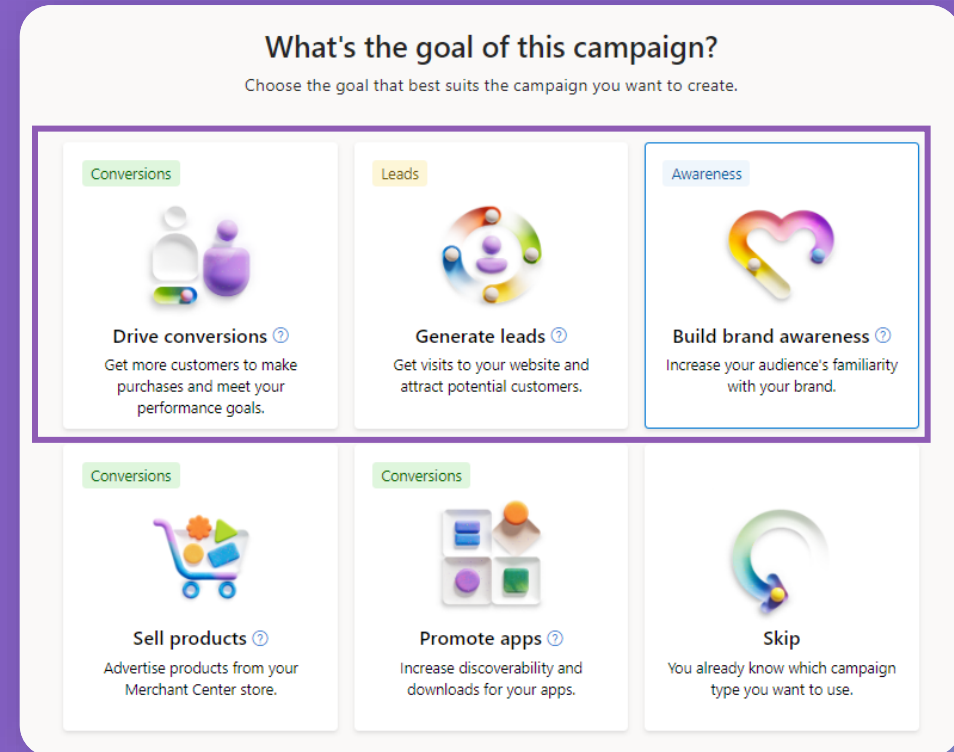

Additional sizes

	Name	Dimensions
PC / Tablet	Super leaderboard	970 x 90
	Full banner	468 x 60
	Large rectangle	336 x 280
	Square	250 x 250
	Skyscraper	120 x 600
	Rectangle	180 x 150
	Half banner	234 x 60
Mobile	Banner	300 x 50
	Portrait interstitial	320 x 480
	Landscape interstitial	480 x 320
	Large banner	320 x 100
	Large banner	216 x 36
	Medium banner	168 x 28
	Small banner	120 x 20

01

Select your campaign goal

To run display ads, select **drive conversions**, **generate leads** or **build brand awareness** as your campaign goal

02

Choose your campaign type

To run display ads, choose **Audience** as your campaign type option and select continue

When creating your campaigns, you can now combine multiple formats in one campaign, or you can focus on one format.

Native: Ads with dynamic content such as images and text that blend into the page.

Display: Custom creatives for ads that stand out on the page.

Video: Online video ads that serve in instream and outstream placements

Select a campaign type

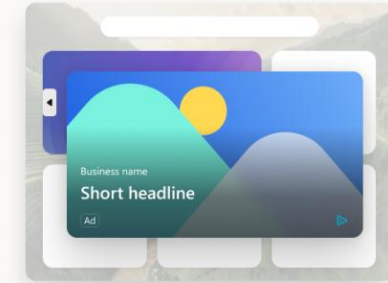

Choose the **conversion-based** campaign that's right for you.

 **Performance Max** ⓘ
Provide assets and we'll create ads for you using Microsoft AI.

 **Audience** ⓘ ☒
Target your ideal audience in the right place at the right time.

 **Search** ⓘ
Get in front of interested customers across search and search intent-powered display.

 **Lodging** ⓘ
Manage your Hotel price ads and Property promotion ads.

Create ads

Show compelling ads to your ideal audience across the Microsoft Advertising Network.

 **Native**
Show personalized, responsive, and visually rich ads based on your assets.

 **Display** ☒
Showcase eye-catching, customized image ads.

 **Video**
Engage viewers as they browse the web and watch videos.

03 Create your ads

Now it's time to upload your ads. Make sure that the assets you upload are aligned with the display ad types that we accept

- Upload your **image** and select the size or input your final URL to get recommended AI generated creatives.
- Enter the **final URL**
- Create multiple ads by selecting create another ad
- **Tip:** Create three or more display ads with different aspect ratios in your campaign or ad group to help maximize performance. Consider focusing on sizes that serve on Microsoft sites to showcase your brand on premium inventory.

AI-generated creatives
 Our AI pulls text and images from your Final URL to automatically generate creatives for your ads.

Using HTML5 creative*

- HTML5 banner ads offer dynamic, interactive experiences (e.g., animations, video, responsive design) that drive higher engagement and click-through rates compared to static banner ads, which are limited to simple, non-interactive visuals
- Your HTML5 asset must be fully self-contained, with no external calls or references. If external references are found during our editorial process, the ad will be disapproved. For more information, refer to the full [display ads specifications](#)

Your ads

We create ads for you based on your assets. You can choose to add your own images below.

Connecting IAS to Microsoft Advertising

You can connect to IAS while creating or editing your display ads.

- Log in to your account in **IAS Signal**.
- Go to **Campaigns > Campaign Setup**.
- Create your campaign.
- Add **Microsoft Advertising Network** as a media partner to your campaign.
- Go to **Media Partner Blocking**.
- Select **Monitoring**.
- Finish setting up your campaign.
- Select **Save**.
- You'll be prompted to download the Microsoft Advertising Network tag in **Tag Manager**.
- Go to **Tag Manager** to download the **Tag URL**.

This is an example of what your Tag URL will look like for display ads:

<https://pixel.adsafeprotected.com/rjss/st/XXXXXX/YYYYY/skeleton.js>

X is the Advertiser ID and Y is the Publisher ID

By participating in this beta trial, you agree to the terms and conditions of IAS's Beta Participation Agreement found at <https://integralads.com/beta-participation-agreement/>.

Connecting IAS to Microsoft Advertising

To connect IAS and Microsoft Advertising, you must locate your Tag URL.

- After adding your display assets, choose from the list of **Third-party partners** below **Third-party measurement**
- Enter your **Tag URL**
- Note: When you enter your **Tag URL**, we automatically detect your Advertiser ID and Publisher ID. This information allows us to successfully connect third-party measurement. If we're unable to detect the Advertiser ID and Publisher ID from your Tag URL, then we can't connect third-party measurement. To fix this, you need to enter the correct Tag URL. See [here](#) for instructions on locating your Tag URL.
- Select **save**

Reporting

Reporting

Use regular performance reports (account, campaign, ad group) to report on display ad performance

METRIC	DEFINITION
Impressions	Total of ad impressions
Clicks	Total of ad clicks
Click-through rate (CTR)	Total ad impressions/clicks
Spend	Total spend
Average CPM	Total spend / impressions (calculated)

- Use website URL (publisher) report to see where display ads are serving. Domain exclusions can be added at the account level to prevent ads from serving on specific sites.

Best practices

Best practices to consider for your campaigns

1

Understand your audience

Carefully plan the audiences you want to reach. Ensure your message is aligned with your target audience.

2

Create ads that stand out

Capture attention with high quality images, clear and concise messaging and strong calls to action.

3

Use clear branding

Reinforce your brand identity and message across your ads. Use logos, colors, fonts and a tone of voice that are recognizable.

4

Landing page optimization

Ensure your landing page matches your ad content, is relevant to your campaign, and offers a seamless user experience.

5

Test and measure

Analyze what works best and optimize. Use reporting to assess performance and make changes, as necessary.

6

Align with industry standards

Use creative that aligns with [IAB sizes](#). You should have a separate image for each creative size to ensure the best ad rendering.

Frequently asked questions

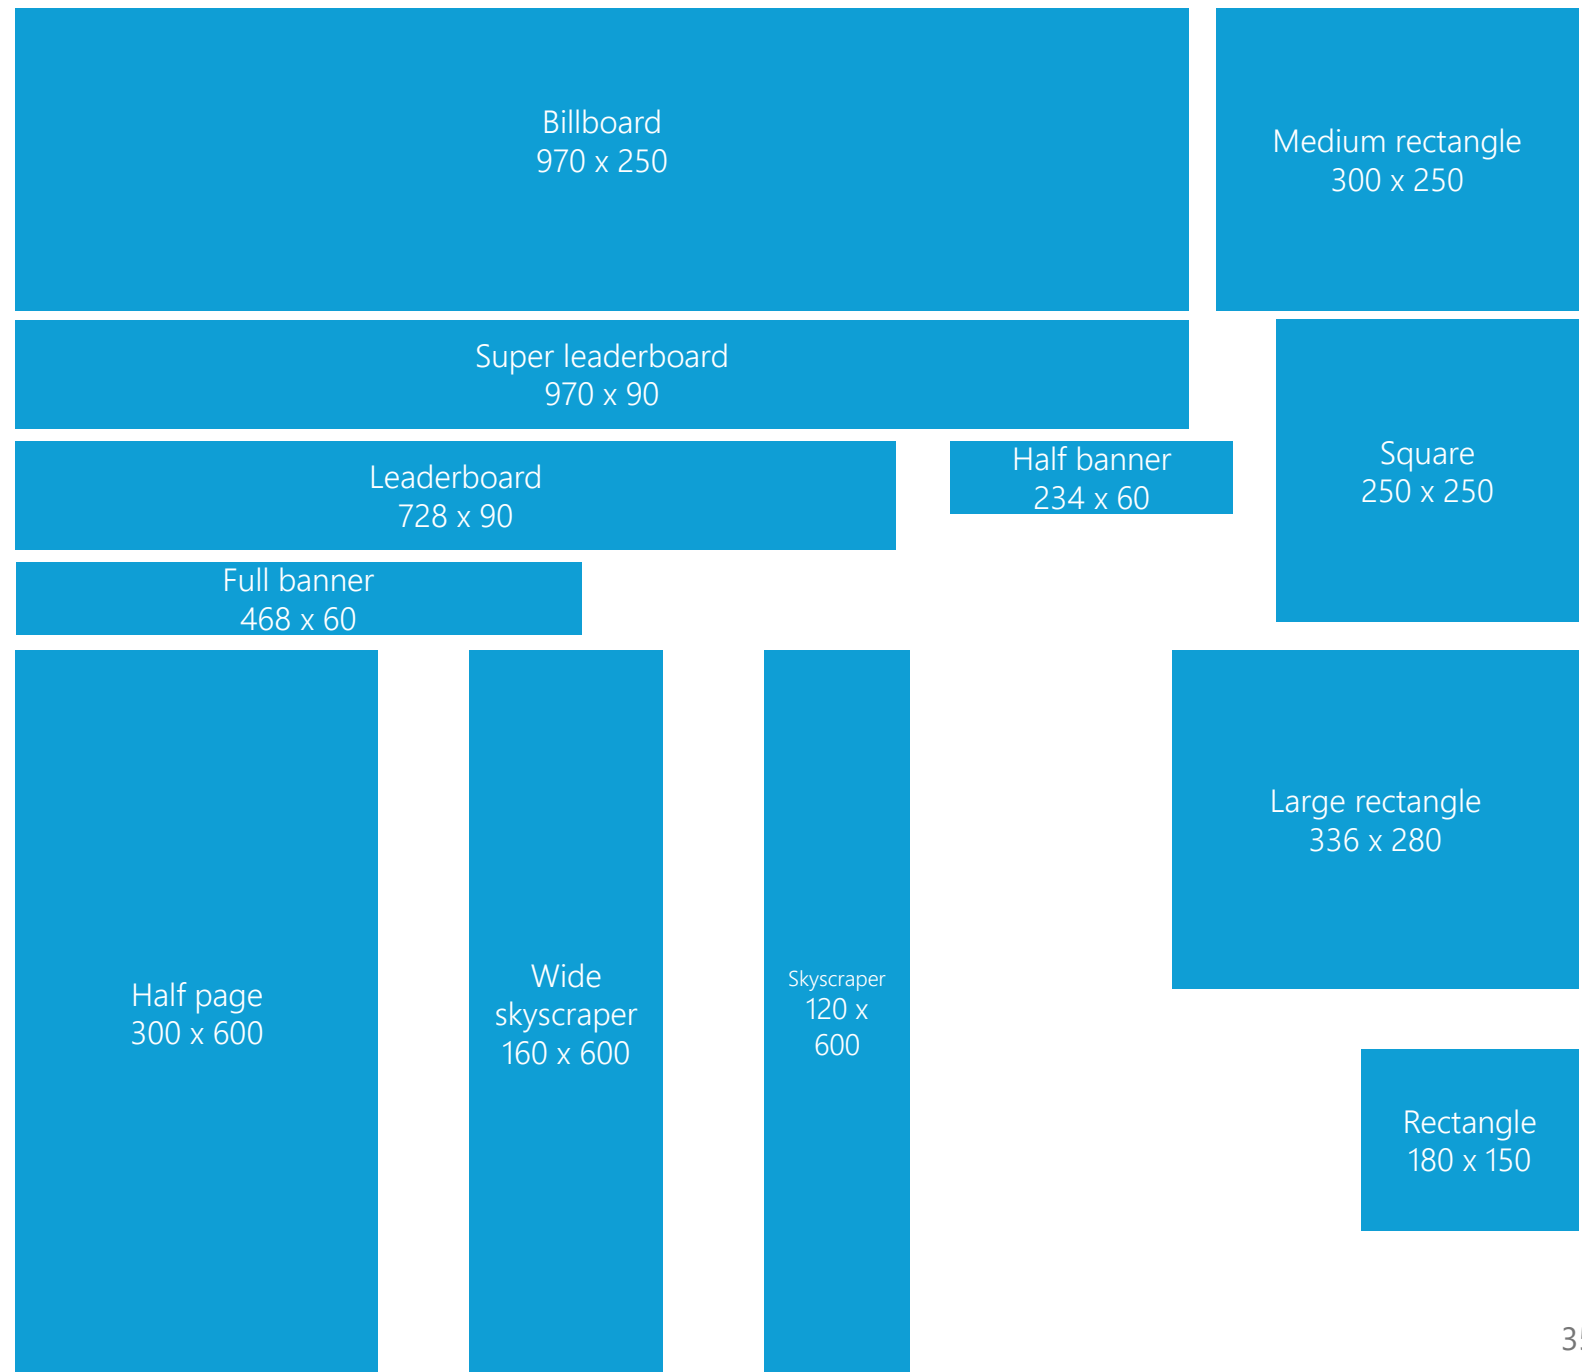

What bid strategies are supported for display ads?	For display ads, you can use manual CPM, enhanced CPC and maximize conversions or target CPA.
Can I track conversions?	Yes, conversion tracking is supported for Display ads.
What kind of creatives can I use for my display campaigns?	We accept a wide range of image sizes that align with the IAB industry standards. Review slide 13 in this presentation for an overview of the image sizes that we accept.
Can I provide HTML5 banners?	No. HTML5 banners are not currently supported.
Can I provide third party hosted creatives?	No. All creatives must be uploaded directly to Microsoft Advertising when creating your campaign.
Where will my display ads serve?	Display ads will be eligible to serve across Microsoft properties and a wide range of publisher partners. To review where your ads serve, you can use the website URL publisher report in the Microsoft Advertising UI.

Frequently asked questions

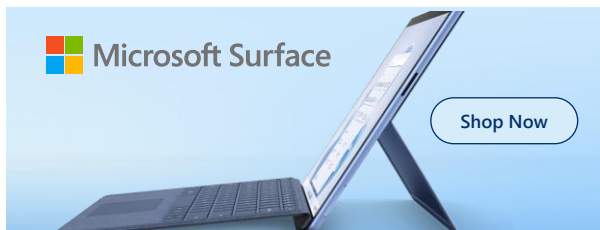

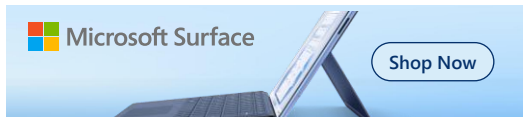

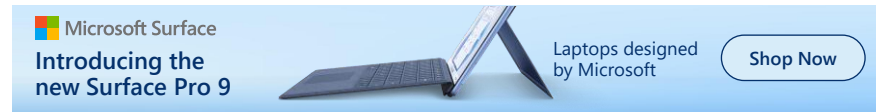

Can I use website exclusions for display ads?	Yes, you can implement website exclusions for display ads at the account level. This will prevent your ads from serving on particular sites that you choose.
Which creative sizes serve on Microsoft properties?	MSN: 300x250/300x600 (both ad sizes serve often serve in the same ad slot and 728x90 Outlook: 160x600, 300x250/300x600
At what level can I implement IAS pixels for third party measurement?	IAS pixels are supported at the ad level.
Can I import my display creatives from Google using your Google import tool?	No, it is not currently possible to import display creatives from Google.

MSN

The screenshot shows the MSN homepage with a Microsoft Start header. The main navigation bar includes links for Discover, Following, Money, My Watchlist, Markets, Expert Portfolios, Cryptocurrencies, Events, and Watchlist Ideas. A search bar is located at the top right. Below the navigation bar, there is a section for Popular stocks with a list of tickers and their price changes. The main content area features a large advertisement for the Microsoft Surface Pro 9, which includes the text "Introducing the new Surface Pro 9" and "Laptops designed by Microsoft", along with a "Shop Now" button. Below the advertisement, there is a "Market Brief" section with a headline "Bitcoin Holds Steady, Ethereum Rises, Dogecoin Falls: A Look At Crypto..." and a sub-headline "Benzinga - 8 hr. ago". To the right of the market brief, there is a "Markets" section with tabs for US, Futures, Global, Commodities, and Currencies. The US Markets tab is selected, showing a table of market indices and their values. Below the table, there is a line chart showing the price movement of a stock over time.
