

Shopping Campaigns on the Microsoft Audience Network

Expand your shopping reach through shopping campaigns on the Microsoft Audience Network

Use your existing Shopping Campaigns feed from search.

When combined with Microsoft AI intent signals, we'll match searchers with the items in your feed that they've shown interest in.

Shopping Campaigns on the Microsoft Audience Network

5 easy steps to set up, campaign creation in 2 minutes or less!

1.

What's the goal of this campaign?

Visits to my website
Visits to my business location(s)
Conversions in my website
Phone calls to my business
App installs
Sell products from your catalog

Research & other tools

Research keywords
Import from a file
Import from Google Ads
Free coaching on creating a campaign

Select Create New Campaign and select "Sell Products From Catalog"

2.

Select a campaign subtype.

Smart Shopping
Standard Shopping
Audience ads

Select "Standard Shopping" and then "Audience Ads" Option

3.

1. Campaign Settings

Tell us about your campaign

Campaign Name Contoso Test
115 characters remaining

Daily budget ☒ Individual budget
1000.00 USD per day
Daily budget options
☐ Apply a budget from the Shared Library

Store ID: 1618177, Name: test_store_sandbox

Products ☒ All products
☐ Filtered products

Save & go to next step Cancel

Set Campaign Name, choose MSC store and select "All Products" filter. We recommend no product filters to maximize volume.

4.

1. Campaign Settings 2. Audiences & Targets 3. Budget & bids

Ad group name Contoso Ad Group
240 characters remaining

Who do you want to target for this ad group? You can select any combination of the criteria below.

Location Show your ads to people in specific locations.
Age Show your ads to people in specific age ranges.
Gender Show your ads to people in specific gender groups.

Audience Show your ads to groups of people based on their interests or interactions with your website.
Company Show your ads to people who work for specific companies.
Job function Show your ads to people who have specific kinds of jobs.

Location Where do you want your ads to appear?
☒ Canada, United States
☐ All available countries/regions
☐ Let me choose specific locations

Age Show your ads to people in these age ranges:
Deviated all
☐ 18-24 ☐ 25-34
☐ 35-49 ☐ 50-64
☐ 65+ ☐ Unknown

Gender Show your ads to people in these gender groups:
Deviated all
☐ Female ☐ Male
☐ Unknown

Possible monthly impressions: 864,306
Normal
These are estimated figures and do not guarantee future results. Note: These estimated figures take into account all targeting for this ad group except device type and ad schedule.

Set Audience Targets. Any audiences should be layered on as "bid only" to maximize volume

5.

1. Campaign Settings

Daily budget 1000.00 USD per day
Daily budget options

Default bid 1.50 USD

[Bid adjustment](#)
[Ad Schedule](#)

Save Back

Set Daily Budget and Default Bid. We recommend ~10% of Search Shopping Spend as a starting point and a minimum of \$2.00 bid to start, Hit Save and LAUNCH

Important Tips to Remember

- Must have an active shopping feed to launch
- UET is highly recommended, but not required.
- Allow 24-48 hours for delivery to begin ramping

Introducing feed improvements

Easily manage your feed-based campaigns and filter products with more granularity. You'll now be able to filter your feed by ID and category, enter multiple values at once, and exclude values.

We recommend no product filters to maximize volume. However, if you need to filter your campaigns by products, you have more options to do so!

The screenshot displays the 'Create Campaign' interface with a sidebar on the left and a main settings area on the right. The sidebar contains three steps: '1. Campaign Settings' (active), '2. Ad Group, Audiences, & Targets', and '3. Budget & bids'. The main area is titled 'Campaign Settings' with the instruction 'Tell us about your campaign'. It includes a 'Campaign name' field with a placeholder 'campaign name' and a character count of '115 characters remaining'. Below this is the 'Daily budget' section, where 'Individual budget' is selected, showing a value of '25.00' USD per day. There is also an option to 'Apply a budget from the Shared Library'. The 'Catalog' section shows a dropdown menu with the selected catalog 'ID: 1618177, Name: test store_sandbox'. The 'Products' section has 'All products' selected. At the bottom, there is a checkbox for 'Enable personalized promotions'.

*These changes only apply to merchant center feeds and not to dynamic data feeds.

Improvement #1

Users have **more filters** for ID and category to be in parity with search. You can select multiple values and can search for categories. For categories, you can make selections at all levels.

The screenshot shows the 'Campaign Settings' form with a dropdown menu open for the 'Category' field. The dropdown lists a hierarchy of categories: 'Animals & Pet Supplies' (expanded), 'Pet Supplies' (expanded), and a list of sub-categories including 'Bird Supplies', 'Cat Supplies', 'Dog Supplies', 'Fish Supplies', 'Pet Agility Equipment', 'Pet Apparel Hangers', 'Pet Bells & Charms', 'Pet Biometric Monitors', 'Pet Bowl Mats', 'Pet Bowls, Feeders & Waterers', and 'Pet Carriers & Crates'. The 'Fish Supplies' and 'Pet Agility Equipment' items are checked. The 'Category' field in the form below the dropdown is set to 'Fish Supplies, Pet Agili...'. The form also includes fields for 'Campaign name' (set to 'Audience test'), 'Daily budget' (set to '25.00'), 'Catalog' (set to 'ID: 1618177, Name: test store_sandbox'), and 'Products' (set to 'Filtered products'). An 'Apply' button is at the bottom.

For example, you can either select "Pet Supplies" as level 1 and include everything below it or you can select just "Fish Supplies" within the pet supplies category.

Improvement #2

Users can now **implement multiple filters** to allow for more granular selection of the products they want to advertise

Products

☐ All products

☒ Filtered products [?](#)

Category	=	Bird Cages & Stands, ...
Brand	=	Brand A Brand B
Condition	≠	New
ID	=	ID 123 ID 456

Apply

Improvement #3

Users can now **enter multiple values** by two ways:

1. Enter in new line
2. Separate by ;

Products

☐ All products

☒ Filtered products ?
