Best practices for Audience ads

AUDIENCES

Leverage audience targeting segment your audience and find the customers who are looking for you. We recommend starting with remarketing and in-market.

Align creatives with your target audience, so they resonate.

BID ADJUSTMENTS

Apply bid adjustments to your audiences based on importance.

We recommend starting with 15-20% and adjusting based on performance. Increase bid adjustments as your audience moves down the funnel.

TARGETING SETTINGS

Decide on either “target and bid” or “bid only” – and don’t forget to bid boost.

Make sure you have narrow enough targeting that your ad will be relevant, but broad enough to scale.

CAMPAIGN STRUCTURE

Each audience type should be split into a different campaign.

Having different campaigns for each audience targeting type you’re using can help you test and optimize more easily.

It is not recommended to add audiences to audience ads shopping campaigns. If adding audiences to these campaigns, they should be added in “bid only”

It takes a few simple steps to get running:

1

Create your campaign.

Determine your objectives and ad formats.

2

Choose your targeting.

Get started with remarketing and in market audiences first.

3

Gather your assets.

Choose images and messaging that fit your campaign goals.

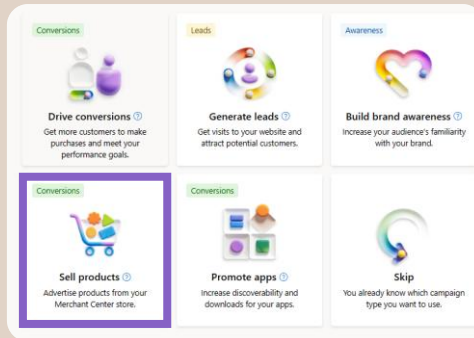

4

Set up your budgets and bids.

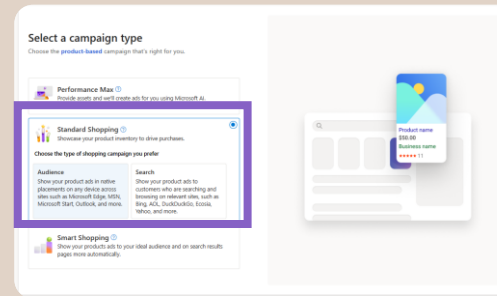

Align with the goals you are trying to reach.

Set up your feed-based campaign

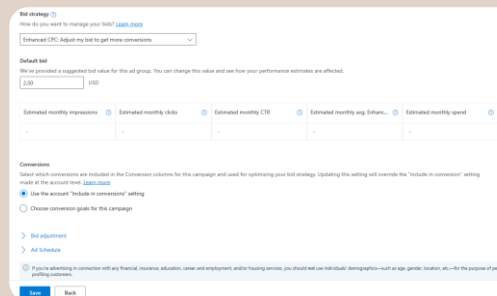

1. Choose 'Sell products' as your campaign goal.

2. Select 'Standard Shopping' and then 'Audience' Option

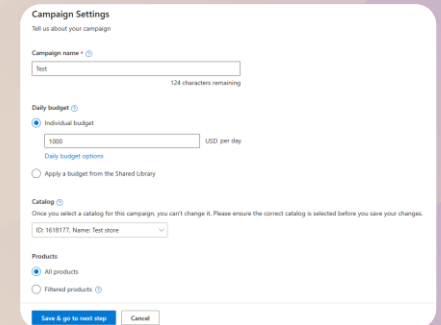

5. Set Choose your bid strategy and set your default bid. We recommend a minimum of \$2.00 bid to start. During this step, you can select your conversion goal setting for this campaign. Apply optional bid adjustments or ad schedules if desired. Hit Save and LAUNCH.

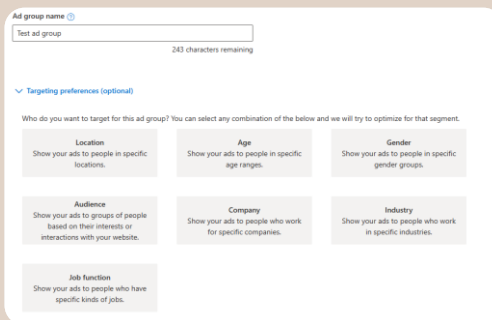

Five easy steps to set up, campaign creation in two minutes or less!

3. Set Campaign Name, set your budget, choose MSC store and select 'All Products' filter. We recommend no product filters to maximize volume.

4. Set ad group name and apply targeting options. For feed-based campaigns, it is recommended to not apply any audience targeting.

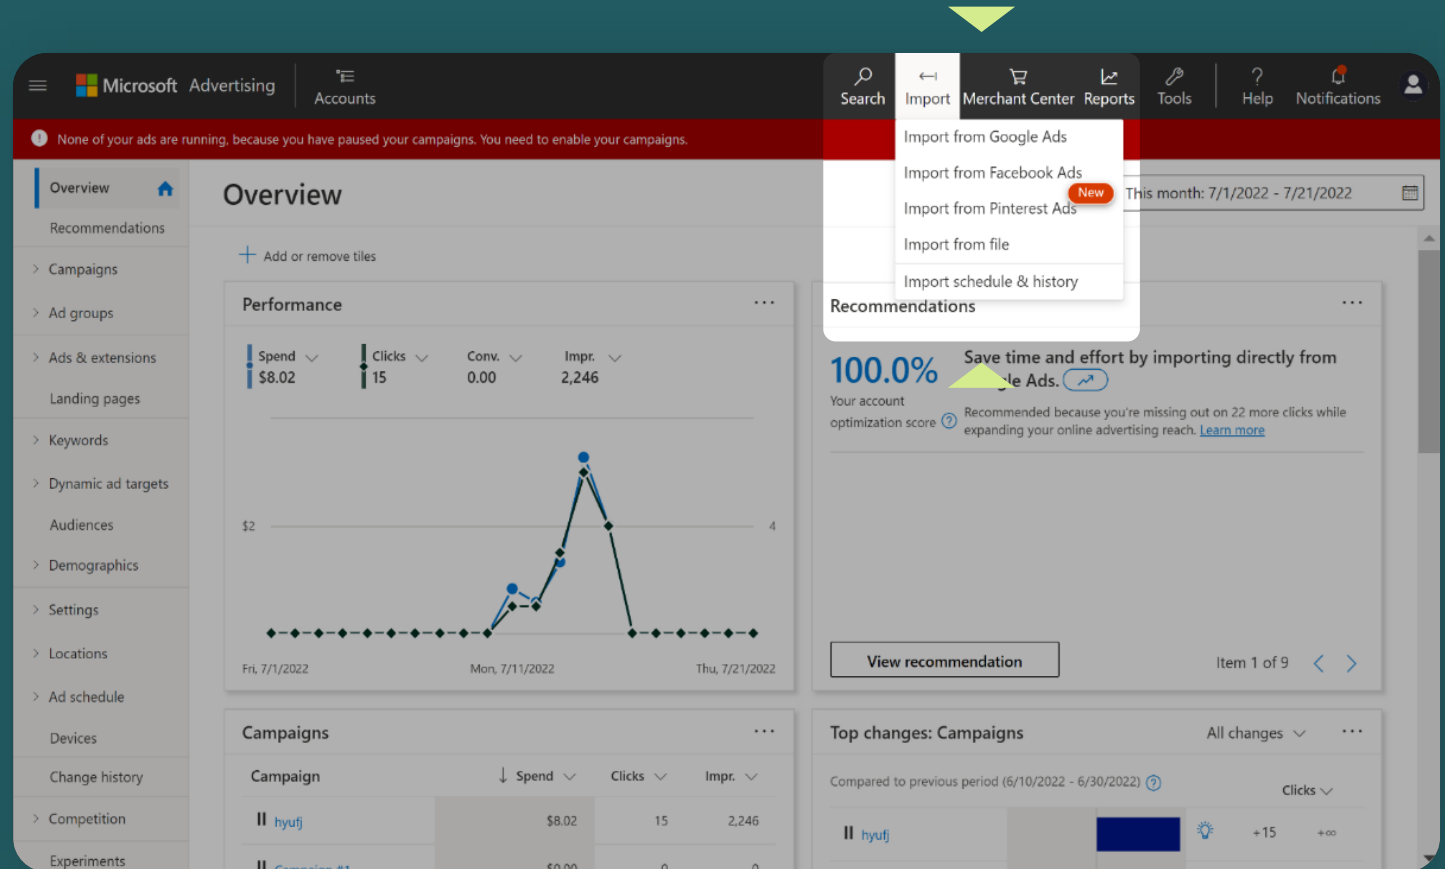

IMPORTANT TIPS TO REMEMBER

- Must have an active shopping feed to launch.
- UET is highly recommended, but not required.
- Allow 24-48 hours for delivery to begin ramping.

Get up and running with Meta, Google and Pinterest import

Running Meta, Google, or Pinterest campaigns?

You can use the same images and ad copy and seamlessly import your campaigns and assets into Microsoft Advertising!

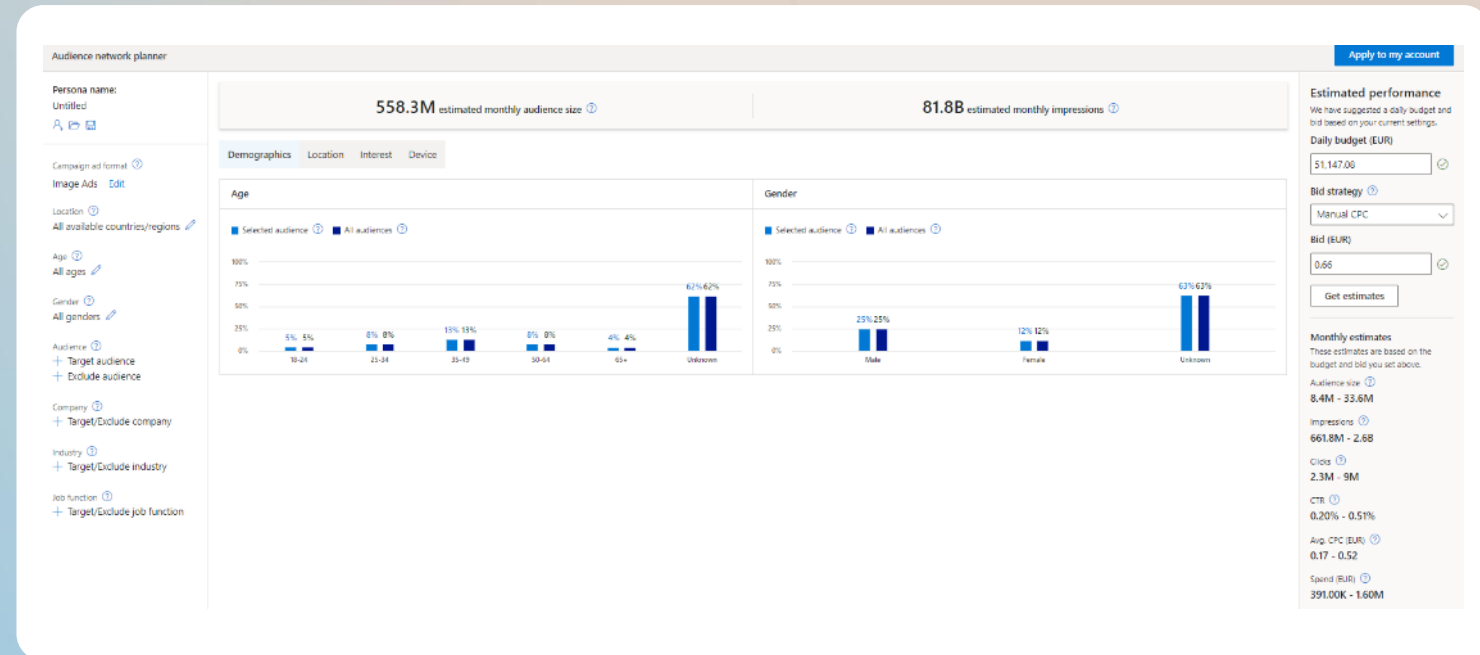

Assess opportunities with Audience planner

Get a better understanding of your audience with insight from the following categories:

- Audience targeting
- Reach estimation
- Audience composition
- Budget & Bid suggestion
- Campaign performance estimation
- Campaign creation
- Persona management

Audience planner currently only supports native ad formats and cannot be used for display and video.

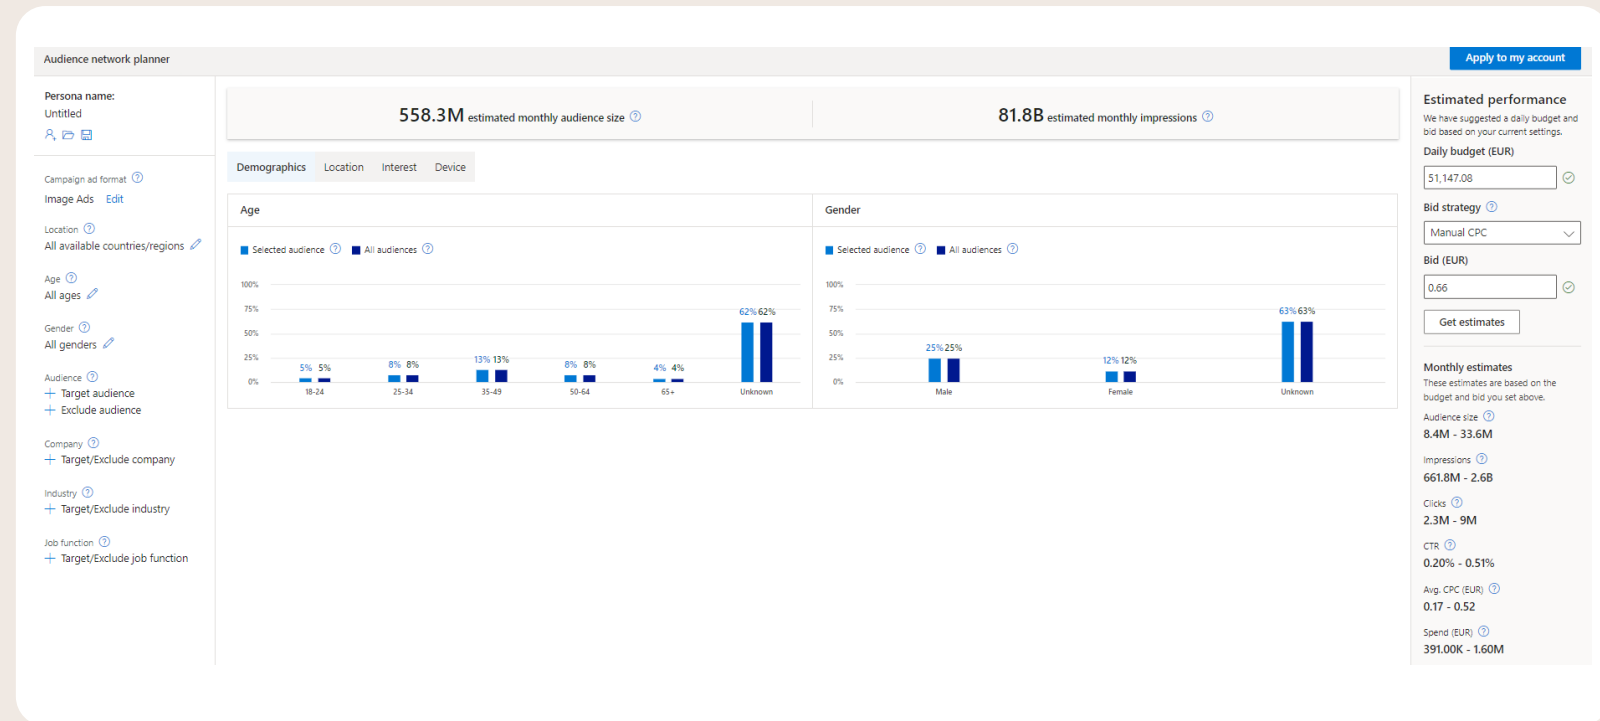

Audience planner improvements

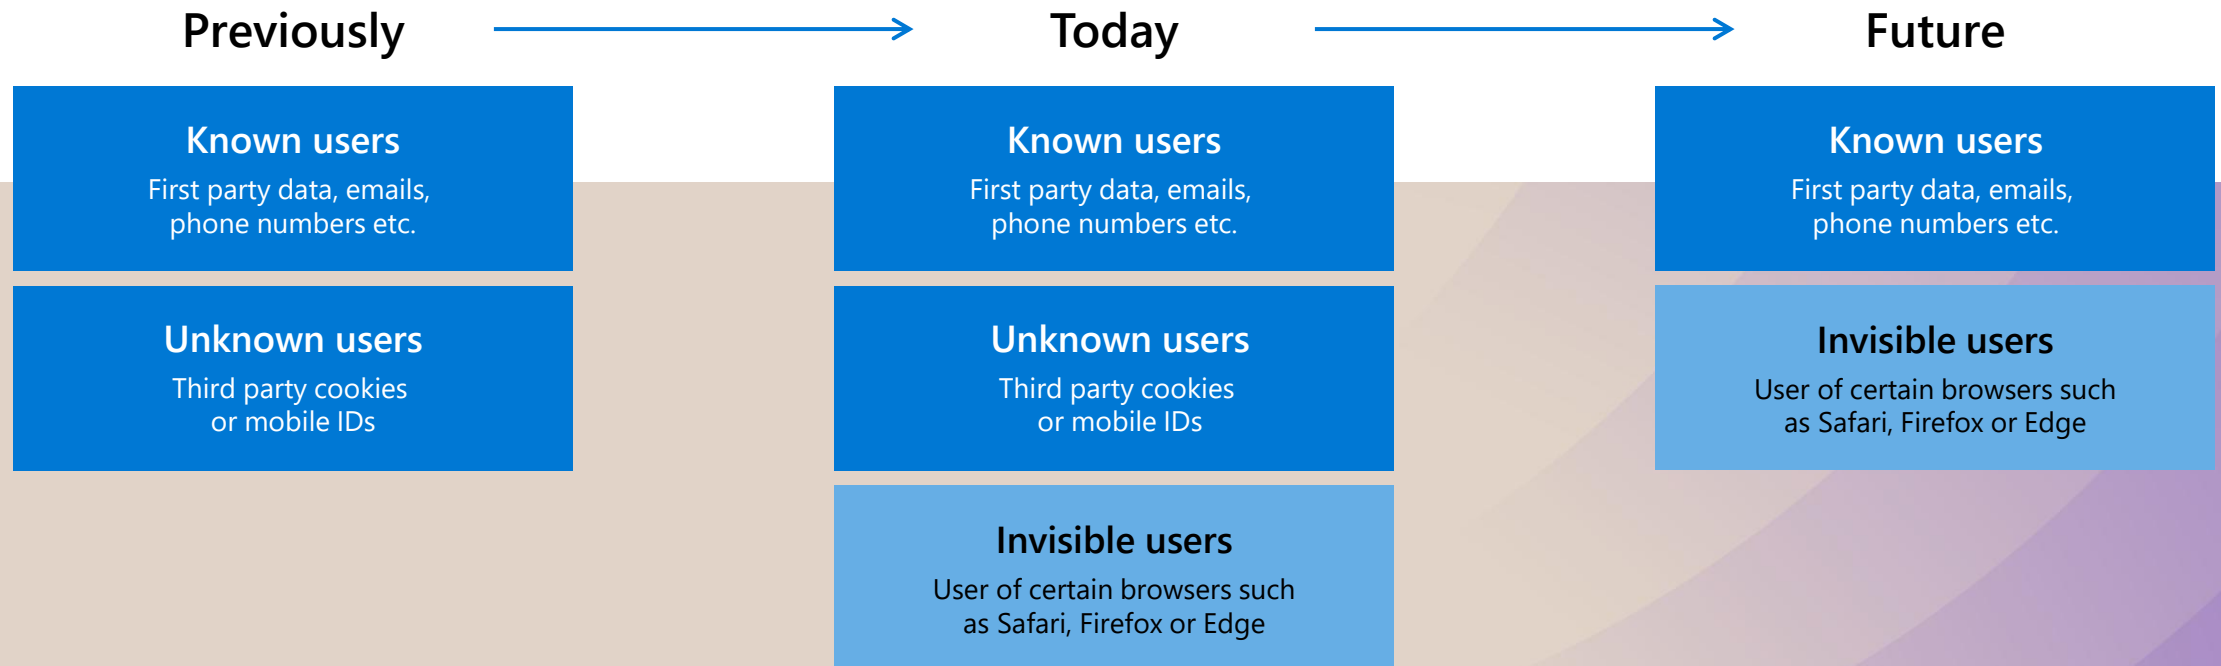

Get accurate, granular forecasts to better understand reach

Improvements to Audience planner include:

- Forecasts by **display, video, and multi-format campaigns**
- Support for more **bid strategies**
- Updates to calculations for **more accurate and granular forecasts**

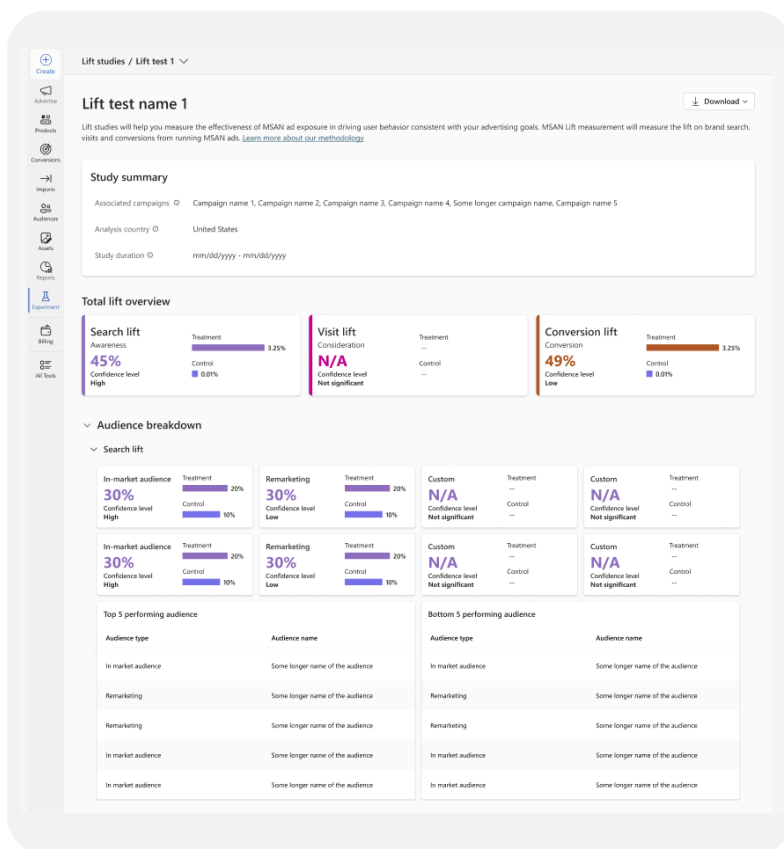

Understanding customer behavior is becoming more challenging

Lift measurement

MORE RESULTS, LESS EFFORT

Measure ad effectiveness with search lift, visit lift, and conversion lift

Search lift

Are users more likely to search for your brand after being exposed to Audience ads?

Visit lift

Are users more likely to visit your website after being exposed to Audience ads?

Conversion lift

Are users more likely to convert after being exposed to Audience ads?
