Performance Max

Our Platform Capabilities

Six investment areas that define how we build and improve the platform.

01

Show up in more places

Expand your presence across formats and inventory – wherever your customers spend time.

02

Reach the right audiences

Reach the right audiences with targeting signals like LinkedIn data, AI-powered tools, channels, and more.

03

Maximize results with smarter bidding

Drive stronger returns with bidding and budget tools built for every level of control.

04

Build performant creative

Create and optimize ad creative at scale — so every asset works harder.

05

Transparent reporting & optimization

Reporting and personalized insights to see what's working, plan, and optimize with confidence.

06

Simplify your workflows

Streamline campaign creation, onboarding, UI, API, and day-to-day management – less setup and more results.

Show up in more places

Merchant Center UCP setup for Copilot

Richer product catalog data help you show up in Copilot conversations and improve Copilot answers to drive greater engagement. Enable your products for shopping experiences in Copilot, from discovery to checkout.

Geo: US
Campaign Type: Shopping, Performance Max
Timeline: Open Pilot

Brand Agents

Make your products discoverable in Microsoft Copilot and Bing, then convert shoppers on your site with a personalized AI shopping assistant trained on your catalog and brand voice.

Geo: Global
Campaign Type: All
Timeline: Open Pilot. GA August 2026

Brand Agents

Brand Agents help businesses show up in AI-powered discovery on Microsoft Copilot and Bing, then close the sale with a personalized shopping assistant on their own website.

Get discovered where buying decisions start

Connect your catalog to Microsoft Copilot and Bing so products can surface when high-intent shoppers are researching, comparing, and asking AI what to buy

Convert more shoppers on your site

Guide shoppers from questions to purchase with personalized, brand-voiced conversations grounded in your products, content, and policies.

Behavior-aware

Powered by Microsoft Clarity insights, it responds to what shoppers do on the page, not just what they type, adapting to real engagement and hesitation.

Reach the right audiences

Audience generation

Generate a unique audience you want to reach using natural language. Expand beyond predefined segments and unlock tailored targeting to capture more relevant intent.

Geo: Current: US, Canada, United Kingdom, Australia (Global for GA)
Campaign Type: Audience ads, OBCC
Timeline: Open Pilot

Bulk Company List Upload for LinkedIn Profile Targeting

Scale account-based targeting by uploading up to 10,000 company names during campaign setup, target matched accounts and adjust bids at the list level, without splitting your list across multiple ad groups.

Geo: Global (underlying consumer data excludes EEA countries)
Campaign Type: Search ads, Audience ads
Timeline: Open Pilot. GA September 2026

Audience Generation

Generate a unique audience built specifically for your campaign using natural language. Move beyond predefined segments and unlock tailored targeting that captures real customer intent.

Describe who you want to reach in plain language

Audience generation translates that intent into ready-to-use audience targeting, without manual setup

Reach the right customers with more precision

Go beyond static, predefined segments. Audience generation helps capture nuance and intent by creating tailored audiences alongside familiar targeting controls such as demographics or in-market audiences, helping you avoid overly broad targeting.

Stay in control with transparent recommendations

AI suggests audiences, but you decide what to use. Review recommended targeting, and confidently activate what works best for your campaign goals.

Maximize results with smarter bidding

Seasonality adjustments for portfolio bid strategies

Apply seasonality adjustments to campaigns in portfolio bid strategies, to better manage short-term performance changes during promotions or events, especially during holiday peak periods. Help bids respond more accurately when results differ from normal patterns.

Geo: Global
Campaign Type: Search, Audience Ads, Shopping
Timeline: GA

Data Driven Attribution

Assign conversion credit based on how each ad interaction touchpoint contributes to results, not just the last click. Understand performance more clearly, while giving automated bidding stronger signals to optimize results.

Geo: Global
Campaign Type: Search, Performance Max, Audience Ads, Shopping
Timeline: GA

Cross-account portfolio bidding

Apply portfolio bid strategies to campaigns across accounts. Reduce manual work and optimize toward common goals at scale.

Geo: Global
Campaign Type: Search, Audience Ads, Shopping
Timeline: GA with 11k campaigns limit, in pilot for up to 100k campaigns

Max Conversion Value (with optional tROAS) for Audience ads

Get more value from every impression by optimizing toward high-value conversions, with optional ROAS targets to guide performance in Audience Ads.

Geo: Global
Campaign Type: Audience Ads
Timeline: Open Pilot

Cross-Account Portfolio bidding

Scale autobidding across campaigns in multiple accounts that share the same goal, using portfolio-level optimization without managing each campaign individually.

Shared goal optimization

Manage and optimize multiple campaigns toward a single shared goal at the cross-account portfolio level.

Smarter optimization at scale

Pool data across campaigns and accounts, allowing autobidding to learn more efficiently at scale.

Less hands-on tuning

Save time with less hands-on bid tuning when managing many campaigns that share the same goal.

Build performant creative

Term exclusions for Asset optimization

Exclude specific words or phrases from appearing in AI-generated text ads, ensuring you have messaging control and can use automated creative with confidence.

Geo: Global, excluding China
Campaign Type: AI Max for Search, Performance Max
Timeline: Open Pilot. GA August 2026

Bulk edits disapproved assets

Quickly identify disapproved text and image assets across campaigns from the Assets tab. Edit assets or appeal policy status in bulk to minimize downtime and manual labor.

Geo: Global
Campaign Type: Native ads, Display ads, RSA, MMA
Timeline: GA August 2026

Ad preview hub

Preview how your ads will appear across placements before you launch and easily share views with stakeholders, streamlining approvals and accelerating campaign launch.

Geo: Global
Campaign Type: Performance Max, Audience ads
Timeline: GA

Bulk edits for disapproved assets

Resolve asset policy issues faster to minimize campaign downtime and keep campaigns delivering smoothly.

Recover performance faster

See asset policy status across assets to resolve delivery issues at scale and reduce downtime.

Reduce manual work

Edit, replace, and manage disapproved assets across multiple campaigns and associations in one workflow, eliminating repetitive asset-by-asset remediation.

More visibility into editorial reviews

See disapproval status and editorial rejection reasons in context, enabling faster diagnosis, informed corrections, and streamlined appeals.

Transparent reporting & optimization

Optimization Experiments

Test a campaign change with confidence before you commit. Measure the impact of a specific campaign optimization in a controlled A/B test so you have proof before you scale.

Geo: Global, excluding China
Campaign Type: Shopping, Audience Ads, Performance Max
Timeline: GA late August 2026

Bid strategy report and average target ROAS/CPA metrics

Review average targets and other bid strategy performance metrics to closely track your bidding behavior over time. Diagnose issues faster and make informed bidding decisions.

Geo: Global
Campaign Type: Search, Performance Max, Audience Ads, Shopping
Timeline: GA

Unified LinkedIn Profile Targeting grid and reporting

View all your professional targeting and demographics in the same grid in the Microsoft Advertising Platform. Compare results easily without switching between multiple views.

Geo: Global (underlying consumer data excludes EEA countries)
Campaign Type: Search ads, Audience ads
Timeline: Open Pilot August 2026.

Conversions API (CAPI)

Connect first-party data from online, offline, CRM, and app sources directly to Microsoft Advertising in real time. CAPI complements UET with additional conversion signals for stronger optimization.

Geo: Global
Campaign Type: All
Timeline: GA

Conversions API

Connect first-party data across online, offline, CRM, and app sources directly to Microsoft Advertising in real time through a server-to-server connection. Conversions API complements your UET setup, providing additional conversion signals while capturing activity that may be missed due to browser limitations.

Drive stronger optimization

Richer signals fuel smarter bidding, giving our algorithms inputs to prioritize high-value audiences and drive outcomes more efficiently.

Improve measurement accuracy

More complete conversion data helps you clearly see how your Microsoft Advertising campaigns drive impact across all touchpoints.

Futureproof your measurement

Server-to-server sharing maintains durable conversion signals while giving you more control over data sharing.

Simplify your workflows

Microsoft Advertising MCP server

Build AI-native advertising workflows that empower your team to run campaign reports, audits, and keyword research from the AI assistants they already use, whether it's M365 Copilot, Claude, or ChatGPT.

Geo: Global, excluding China and India
Campaign Type: Search, Performance Max, Shopping, Audience
Timeline: Open Pilot

AI-powered campaign launchpad for new advertisers

Launch your first campaign in seconds with AI that transforms your business context into a ready-to-go campaign. You stay in complete control to fine-tune every setting before going live.

Geo: Global, excluding China and India
Campaign Type: Search, Performance Max, Audience
Timeline: Open Pilot

Mandatory AIV for Australia & Vietnam

Complete the Advertiser Identity Verification within 30 days of sign-up to build trust with Australian and/or Vietnamese audiences and keep ads running without interruption starting July 1, 2026.

Geo: Global
Campaign Type: Search, Performance Max, Shopping, Audience
Timeline: GA

Simplified conversion tracking experience (setup)

Set up online conversion goals faster with a guided, intuitive experience, optimized settings, and recommendations tailored to your business.

Geo: Global
Campaign Type: N/A
Timeline: Closed Pilot

Modernized web UI experience

Experience a modernized web UI that brings an updated look and feel with an intuitive layout, smarter navigation, upgraded table views, and more. Streamline your daily workflows and manage campaigns more confidently.

Geo: Global
Campaign Type: Search, Performance Max, Shopping, Audience
Timeline: Rolling GA

Microsoft Advertising MCP Server

Run campaign reports, audits, and keyword research conversationally from the AI assistants your team already uses, grounded in live Microsoft Advertising data.

AI-native workflows

Ask in plain language across your account — performance summaries, campaign and keyword deep dives, audience insights, and Google vs. Microsoft comparisons.

Works where your team works

Compatible with M365 Copilot, Claude, ChatGPT, Gemini, and custom agents through an open, industry-standard connection.

Minutes, not hours

Set up in four steps with no developer experience and turn campaign audits and leadership-ready outputs from hours of manual work into minutes.

Performance Max

SHOW UP IN MORE PLACES

Performance Max for Automotive Inventory ads

Reach in-market car shoppers across Microsoft O&O inventory with one AI-optimized campaign built for your vehicle inventory. Manage your feeds more easily in Merchant Center and let auto-bidding optimize toward conversions to improve ROI.

Geo: Global
Timeline: Closed Pilot

REACH THE RIGHT AUDIENCES

Age and gender targeting

Improve targeting and efficiency by excluding specific age groups and genders from ad delivery.

Geo: Global
Timeline: Open Pilot

TRANSPARENT REPORTING & OPTIMIZATION

Search term reporting + auction insights reporting

See auction insights and search term reporting to understand the competitive landscape and which queries you’re serving on.

Geo: Global
Timeline: Search term – GA, Auction insights – Open Pilot August 2026

REACH THE RIGHT AUDIENCES

Device targeting

Improve targeting and efficiency by excluding specific devices from ad delivery.

Geo: Global
Timeline: Open Pilot Sept 2026

TRANSPARENT REPORTING & OPTIMIZATION

Channel performance reporting

See what channels are delivering performance to your Performance Max campaigns so you can better optimize your assets and strategy.

Geo: Global
Timeline: Closed Pilot September 2026

REACH THE RIGHT AUDIENCES

Brand exclusions for text ads only

Set up your brand exclusions to exclude branded search queries from search traffic , to more easily separate your search and shopping strategy in Performance Max.

Geo: Global, excluding China
Timeline: Open Pilot Sept-Oct 2026

TRANSPARENT REPORTING & OPTIMIZATION

Bid strategy report and average target ROAS/CPA metrics

Review average targets and other bid strategy performance metrics to closely track your bidding behavior over time. Diagnose issues faster and make informed bidding decisions.
