Prepare for the age of AI shopping

Driving growth with agentic commerce

Microsoft Advertising

Microsoft's mission is to empower every person and every organization on the planet to achieve more. This includes all Microsoft events and gatherings, including on digital platforms and in person, where we seek to create a respectful, friendly, enjoyable, and inclusive experience for all participants.

We expect all event participants to uphold the principles of this Code of Conduct. The Code of Conduct applies to all aspects of the main event and any related activities, whether digital or in person. Microsoft does not tolerate the following in any aspect of the event program, including business and social activities:

- Behavior that is disruptive, disrespectful, or degrading to others, including any messages, images, or interactions by anyone, in any form, regardless of location.
- Harassment or discrimination based on age, ancestry, color, gender identity or expression, national origin, physical or mental disability, religion, sexual orientation, or any other characteristic protected by applicable local laws, regulations, and ordinances.
- We encourage everyone to assist in creating a welcoming and safe environment. Please report any concerns, harassing behavior, or suspicious or disruptive activity to venue staff, the event host or owner, or the nearest event staff.
- We also encourage everyone to contact Microsoft's Business Conduct Hotline at any time if you feel anything or anyone is not following this Code of Conduct or is inconsistent with Microsoft's culture. The Hotline is available regardless of whether you are a Microsoft employee and can be reached at or +1 (877) 320-MSFT, or call collect outside the United States at +1 (720)-904-6844. Microsoft employees can also report any concerns to their Microsoft Manager.

Microsoft reserves the right to refuse admittance to or remove any person from a Microsoft event at any time at its sole discretion.

Agenda

01

Introduction

02

Get discovered: Agentic catalog

03

Be chosen: Agentic checkout

04

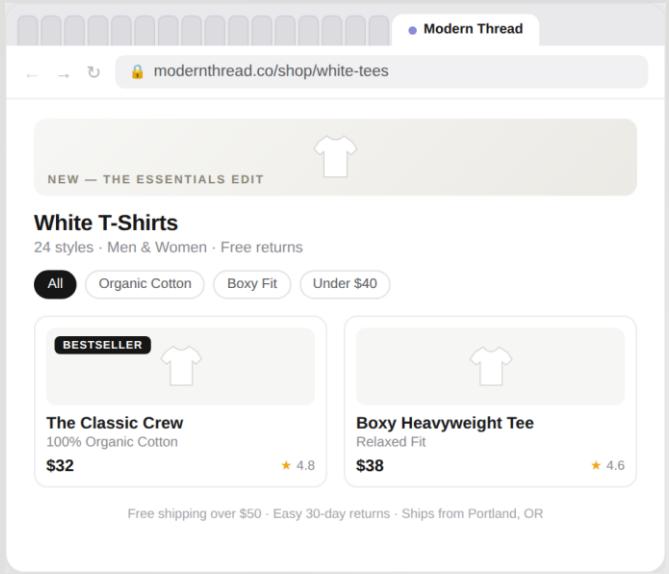

Understand and optimize: Clarity

Introduction

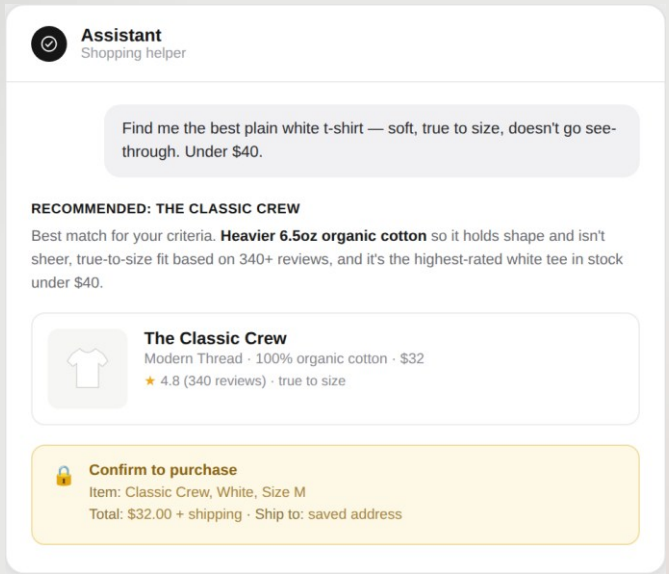

To win, brands need to optimize across all three eras of the web at once

The human web

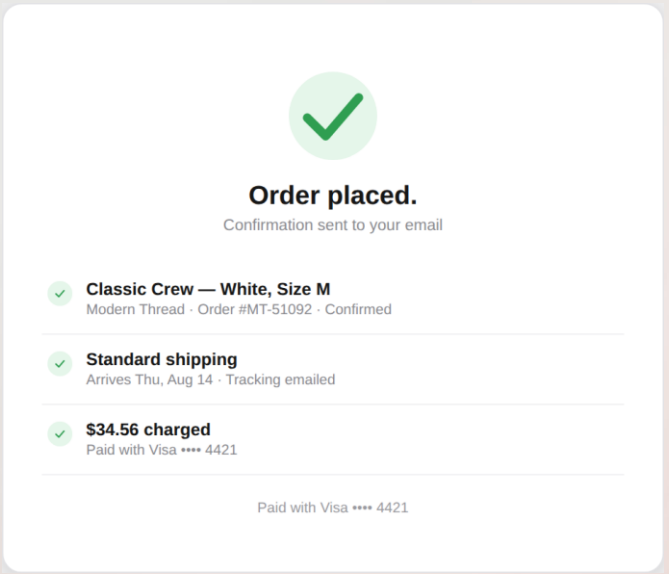

Help me find it

The LLM web

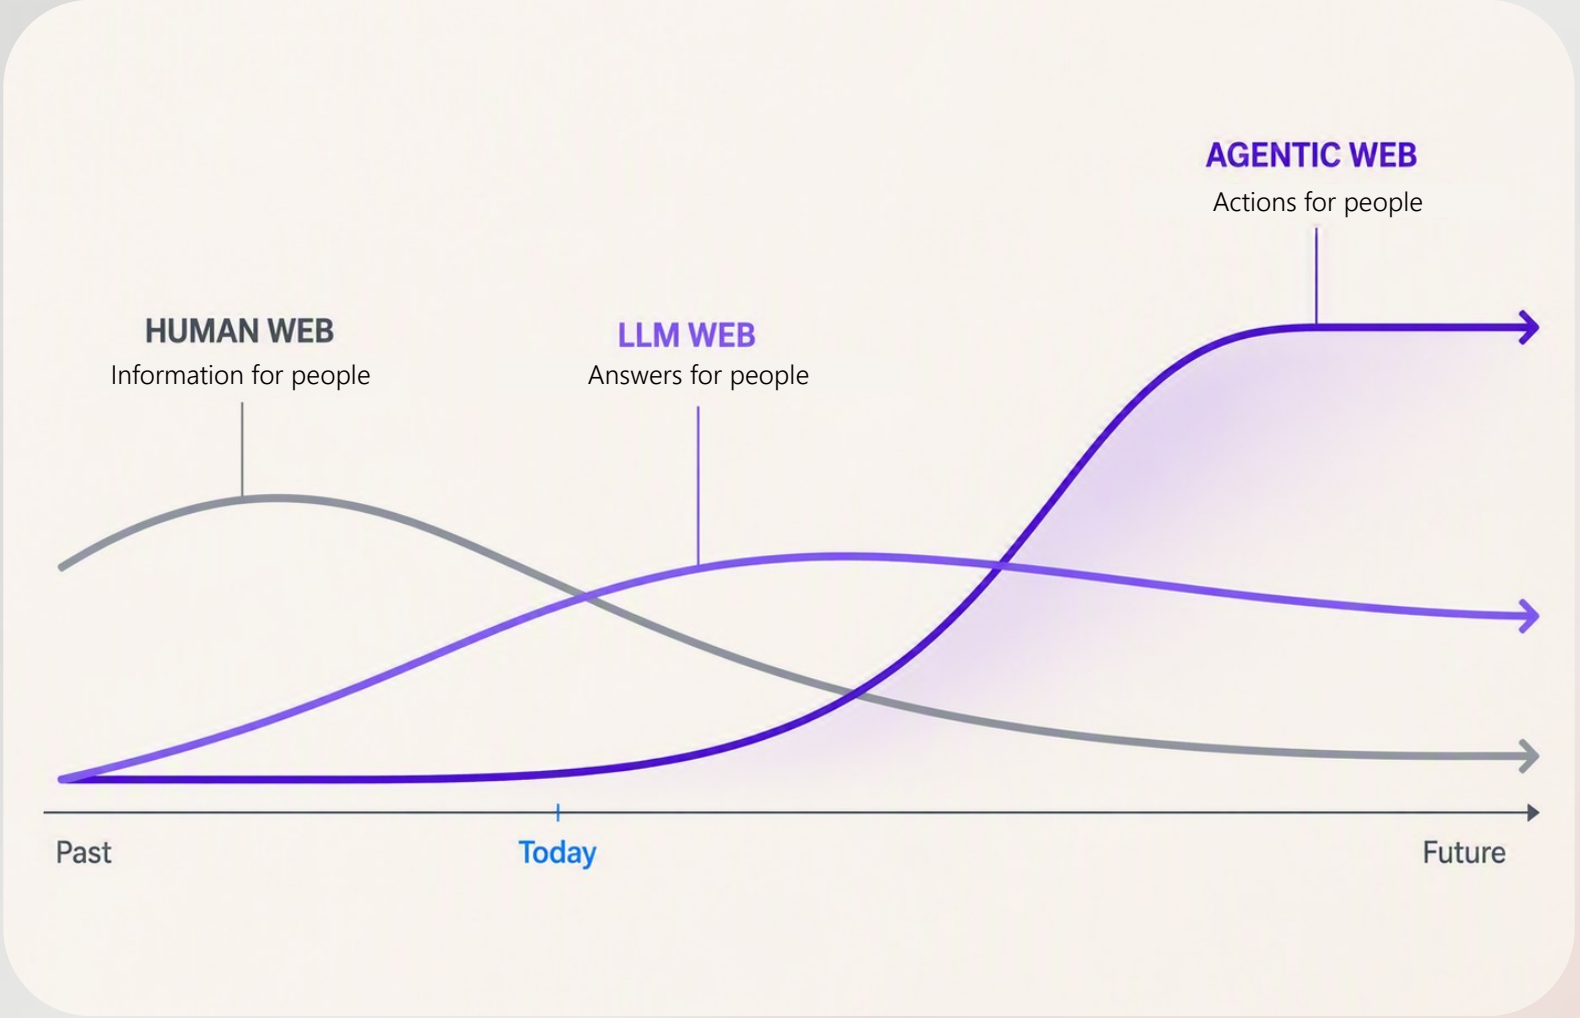

Help me choose

The agentic web

Do it for me

The LLM web & the agentic web are expected to emerge faster than any shift before it

Consumer behavior is already shifting

43% have discovered a new brand through AI

82% rely on AI to choose products for them

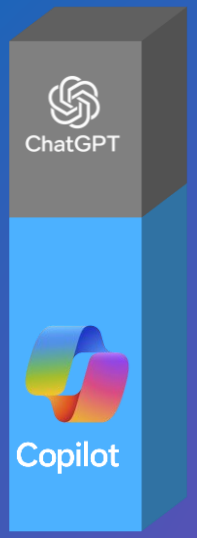

42% higher conversion for AI-referred vs. search-referred shoppers

Microsoft confidential. Sources: Semrush survey of US users, Dec. 2025; Accenture, high AI users in the US, June 2025; Adobe, April 2026

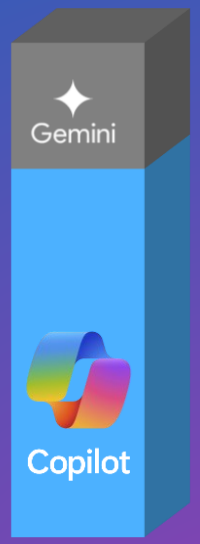

As AI reshapes the shopping funnel, merchants must take actions to stay competitive

Show up	DISCOVERY	Share rich, real-time catalog data
Differentiate your offering	CONSIDERATION	Highlight what makes your brand worth choosing
Close the sale	PURCHASE	Enable agentic checkout
Deliver support | Re-engagement	POST PURCHASE	Share cross-sell & upsell options

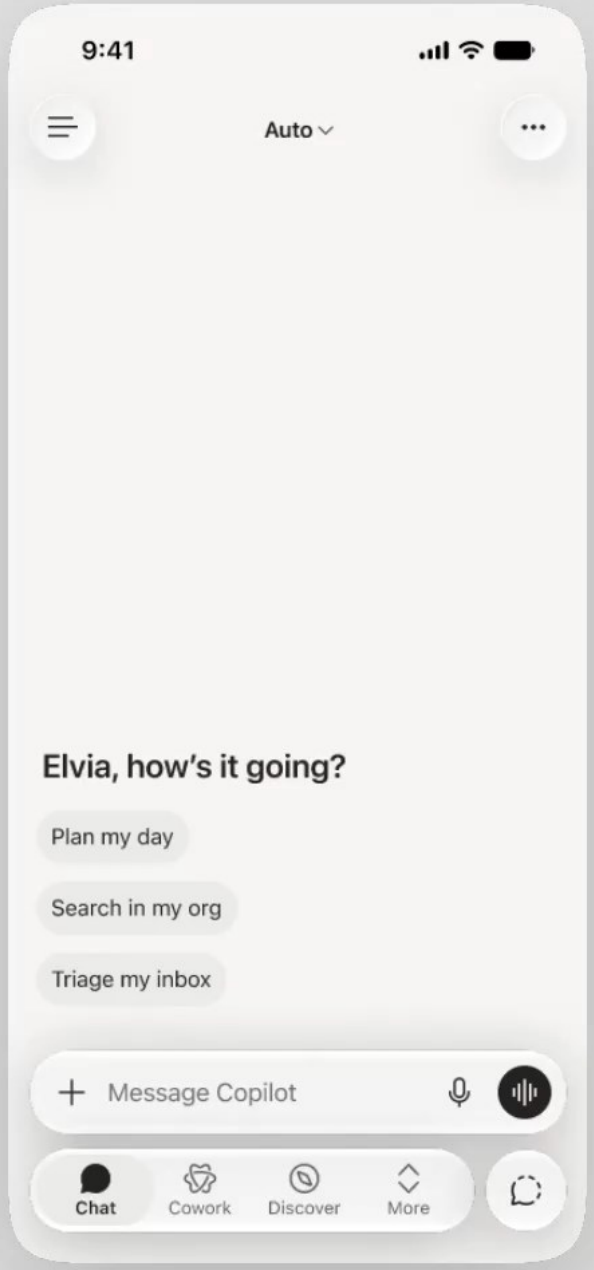

Consumers prefer Copilot shopping

Copilot Shopping won 2/3
of head-to-heads vs. ChatGPT Pro

Copilot Shopping won 3/4
of head-to-heads vs. Gemini Pro

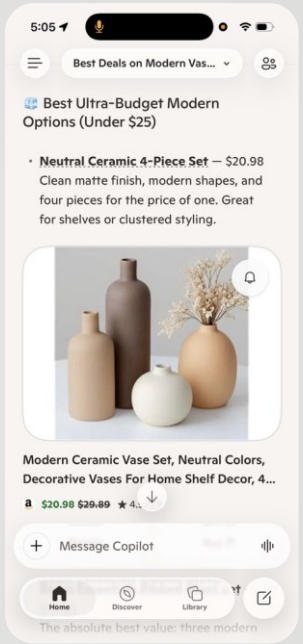

Microsoft Confidential. Sources: Microsoft research, July 2026. Copilot won 64 of 100 head-to-head consumer shopping experiences compared to ChatGPT Pro across all shopping intent types. Copilot won 75 of 102 head-to-head consumer shopping experiences compared to Gemini across all shopping intent types.

Microsoft Advertising

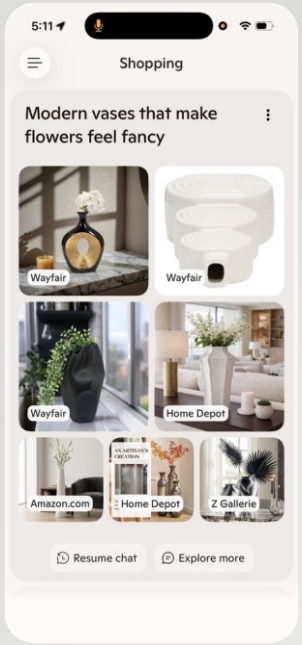

Agentic commerce reaches shoppers across Microsoft
All powered by the same product catalog.

Microsoft reaches 9 in 10 online consumers in the US

Reach higher-income consumers who are making the decisions at work and at home.

Microsoft Advertising

Source: Comscore Media Metrix Multi-Platform, Total U.S. Home & Work, June 2026. Microsoft Sites reached 245.4M unique visitors (87% reach), ranking #2 behind Alphabet (97% reach). [comscore.com]

01

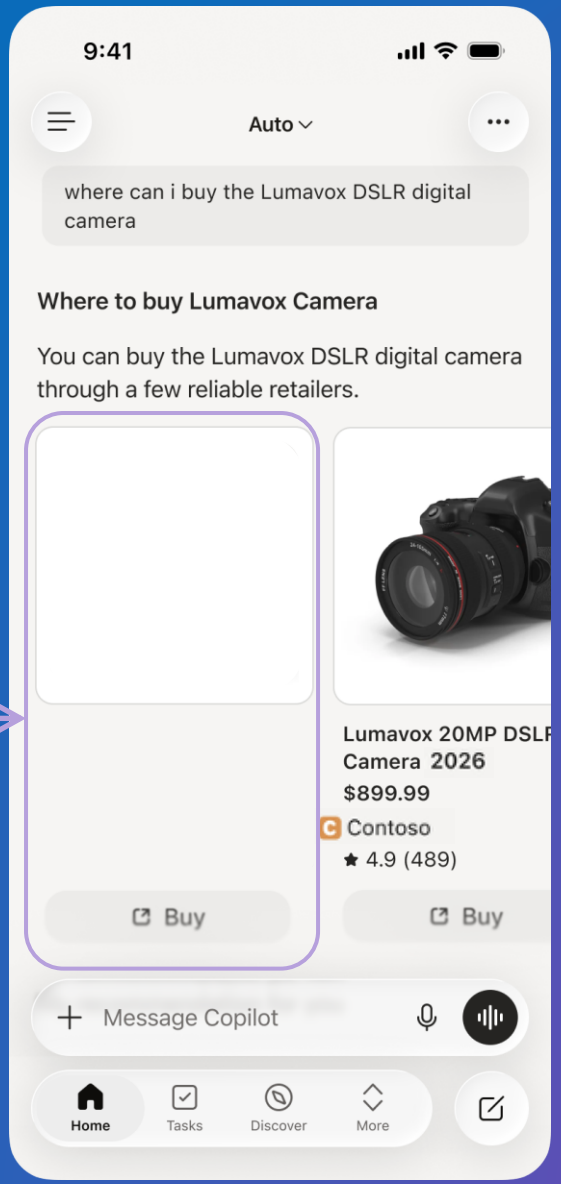

Get discovered

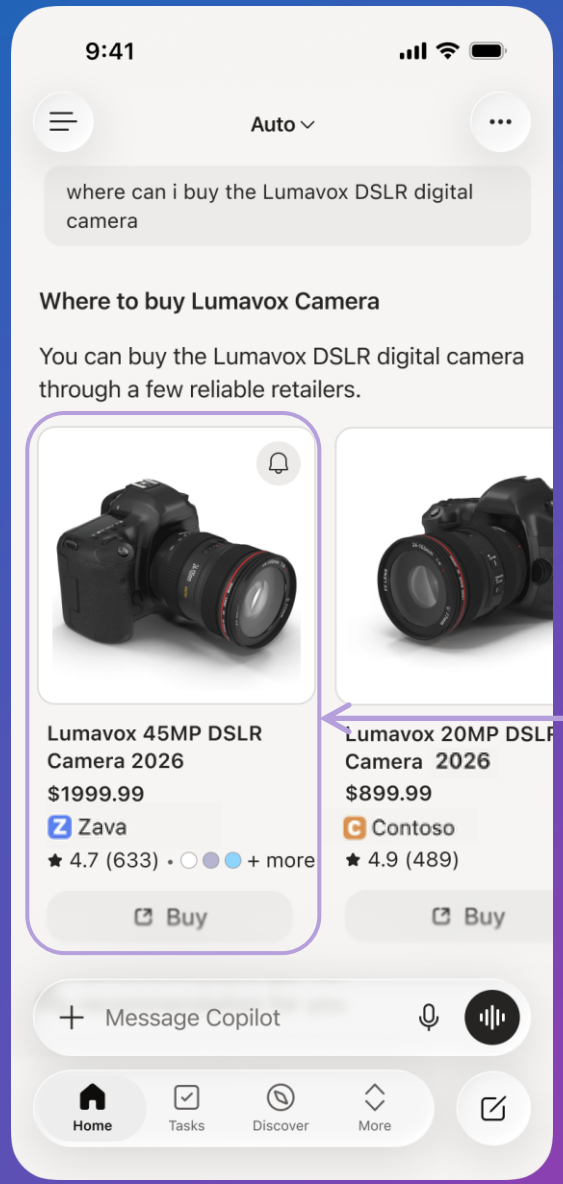

Show up where shoppers find and evaluate brands with an agentic catalog.

Microsoft Advertising

Without an agentic catalog, Zava doesn't show up

With an agentic catalog, Zava is found

DISCOVERY

66%

of average PDPs are not readable by AI

ARE *ALL* YOUR PRODUCTS SHOWING UP?

Illustrative examples only, Microsoft Confidential

Source: Adobe Digital Insights, U.S. retailers see surge in AI traffic, but many websites are not entirely readable by machines (April 16, 2026).

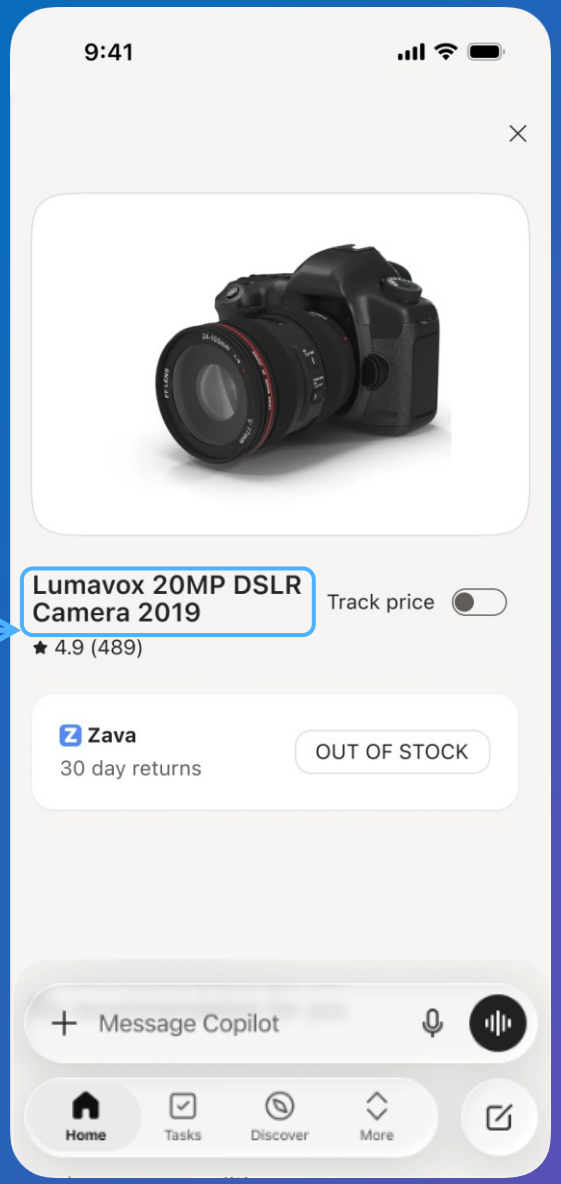

FRESHNESS

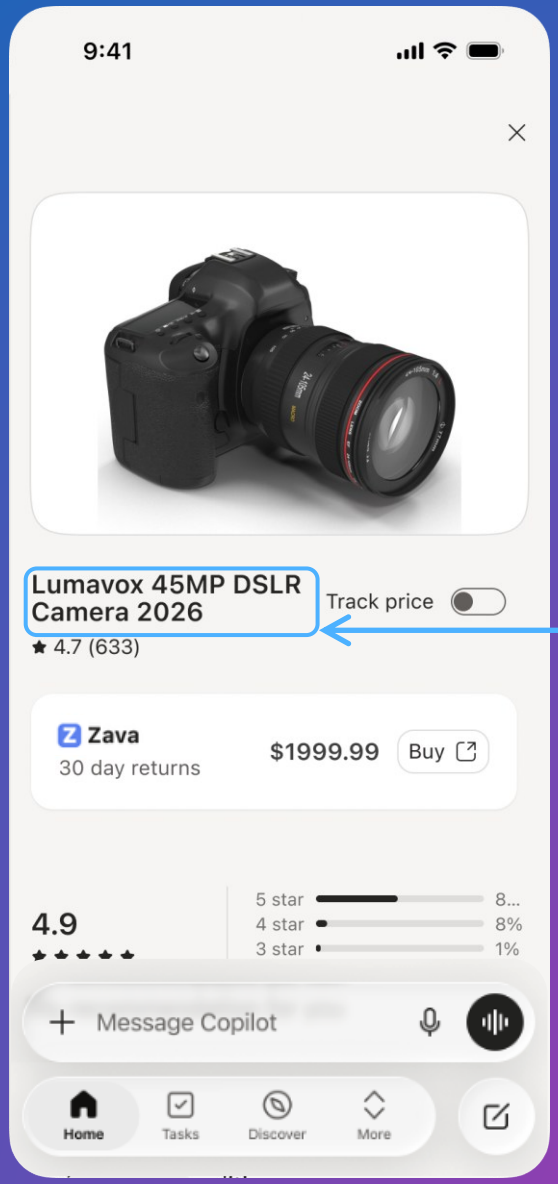

Web scraping suffers from:

- Latency
- Hidden pricing
- Illegible structures
- Bot-blockers

ARE YOU SHARING YOUR LATEST OFFERS?

Outdated model

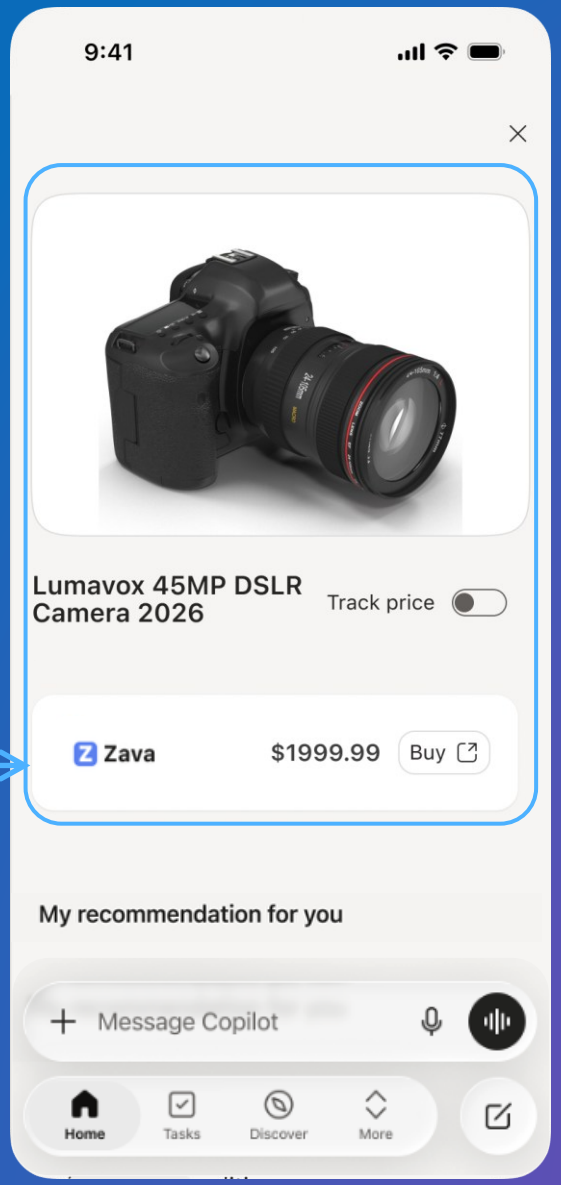

An agentic catalog shows latest model

Illustrative examples only, Microsoft Confidential

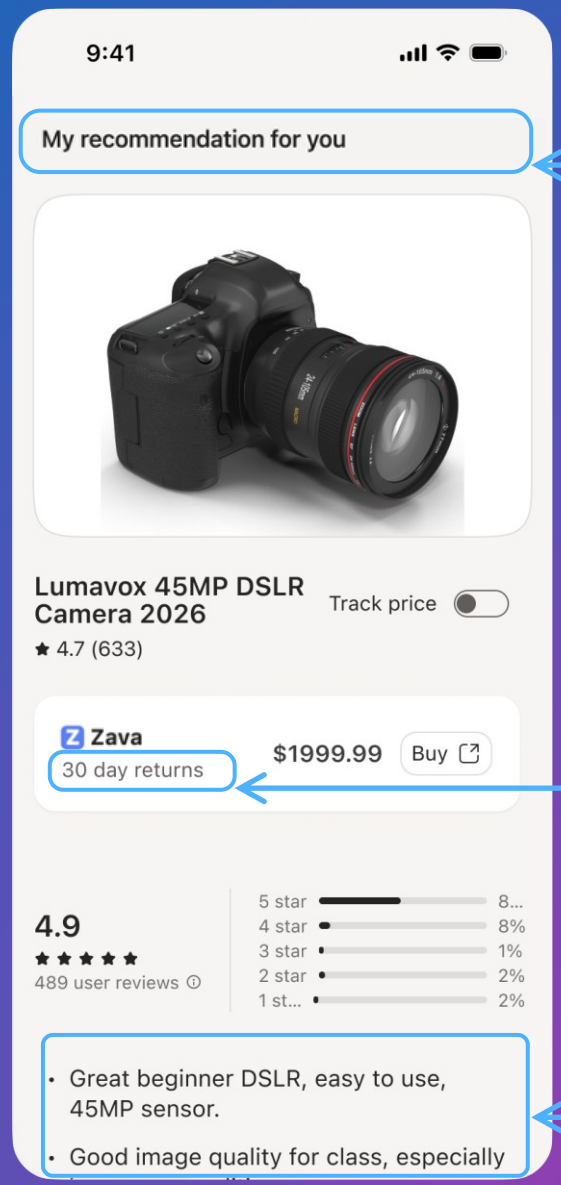

Without an agentic catalog, Zava doesn't stand out

An agentic catalog helps Zava get recommended

...with details like returns

... from merchant-shared specs & FAQs

DEPTH

82%

rely on AI to recommend products

WILL YOUR OFFERINGS STAND OUT IN RECOMMENDATIONS?

Microsoft Advertising

HOW TO GET DISCOVERED

1. Share your full feed—not just the products you advertise
2. Share brand-wide UCP settings in minutes
3. Enhance your product catalog with AI-ready fields

One language, multiple partners

Share agentic context for the open-standard Universal Commerce Protocol

Universal Commerce Protocol (UCP), is a common language for AI and agentic commerce.

Use UCP to connect to multiple AI ecosystem partners without custom adaptations for each.

Share fields that enable UCP:

- In your feeds in Merchant Center
- Import an existing feed
- Via API

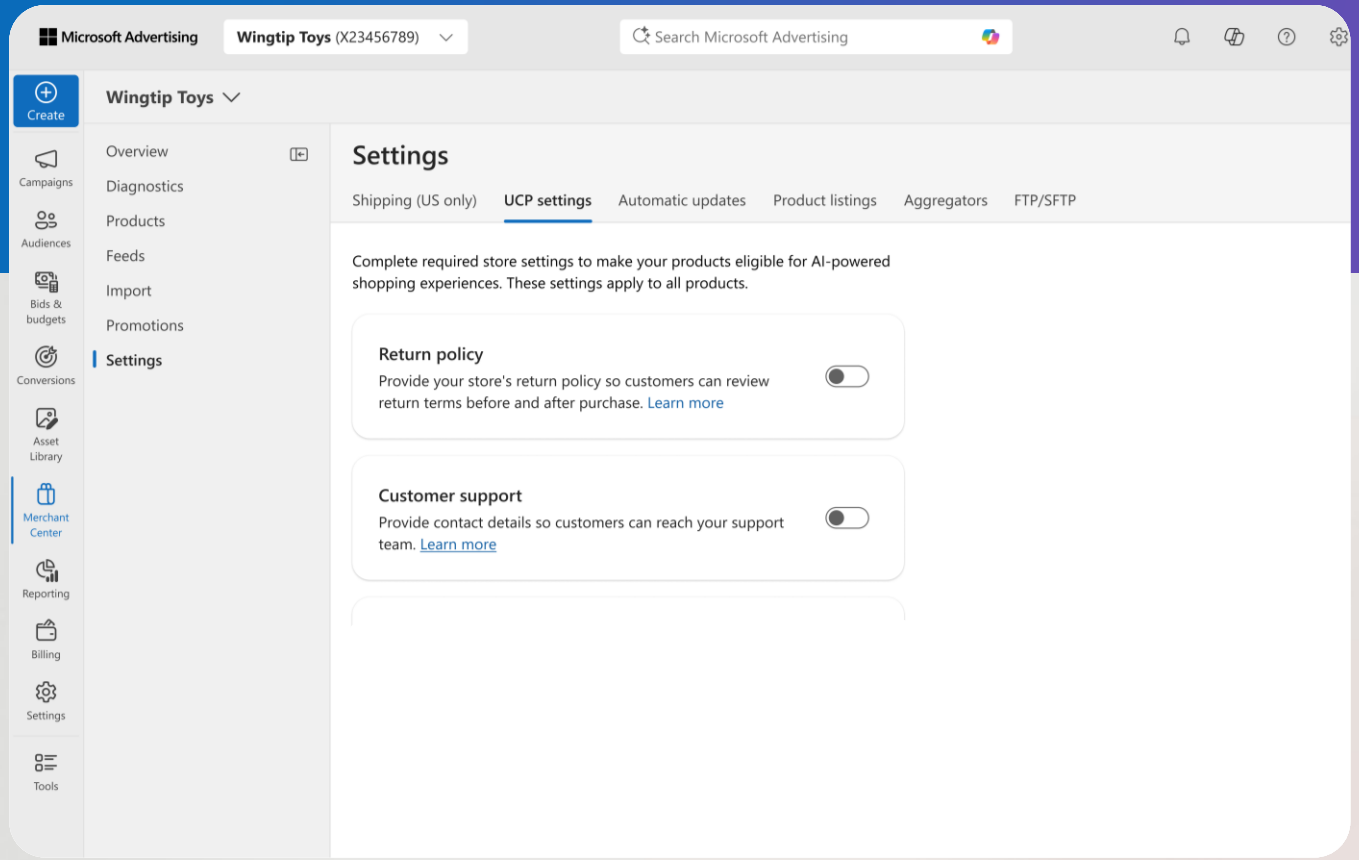

UCP COUNCIL REPRESENTATIVE MEMBERS

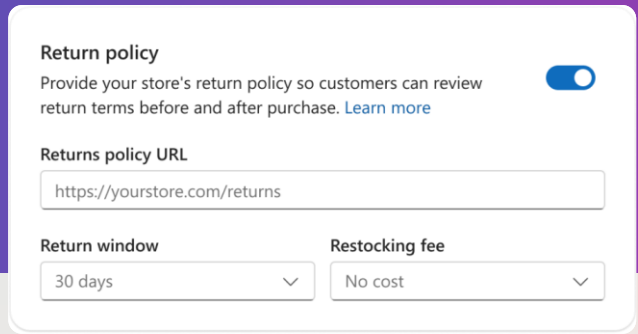

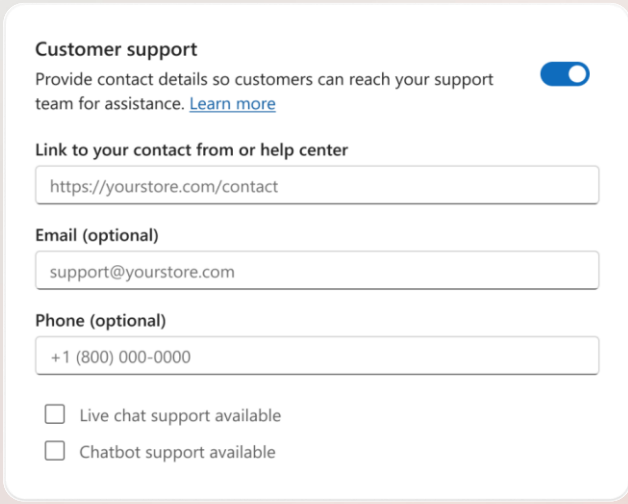

2a

BRAND LEVEL

Activate store settings in Microsoft Merchant Center, in minutes

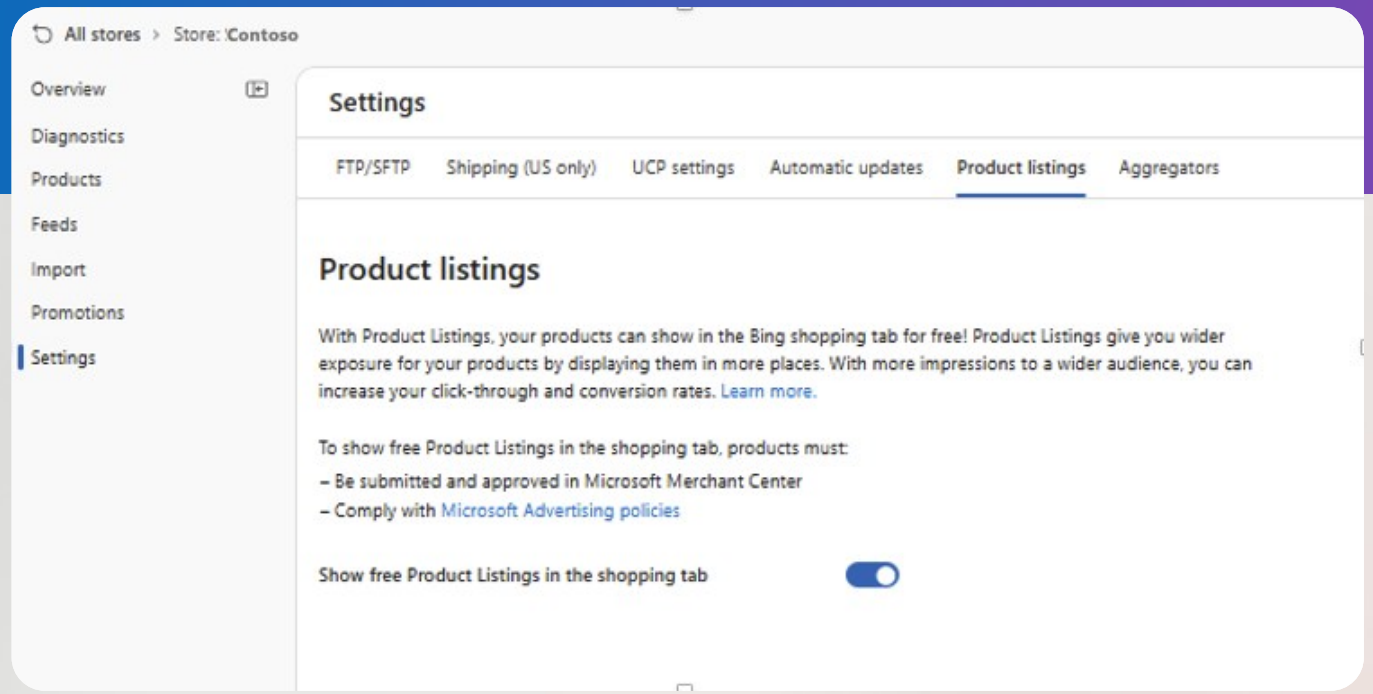

2b

BRAND LEVEL

Side note: Confirm your "free Product Listings" toggle is on

3

PRODUCT LEVEL

Add link options and warnings to your feed

`checkout_link_template`

Ready for referrals

Use this field to add different referral options. For each product in this field, add a link to your cart with the product pre-populated. This gives Microsoft the option to send to the PDP or checkout experience depending on the conversation.

`consumer_notice_type`

`consumer_notice_message`

Compliance, shown before buying

Safety, legal, or health warnings — e.g., Prop 65, allergens — shown to buyers before purchase, when your products need them.

IF APPLICABLE

Or, share an existing feed with these fields

Agentic catalogs drive results

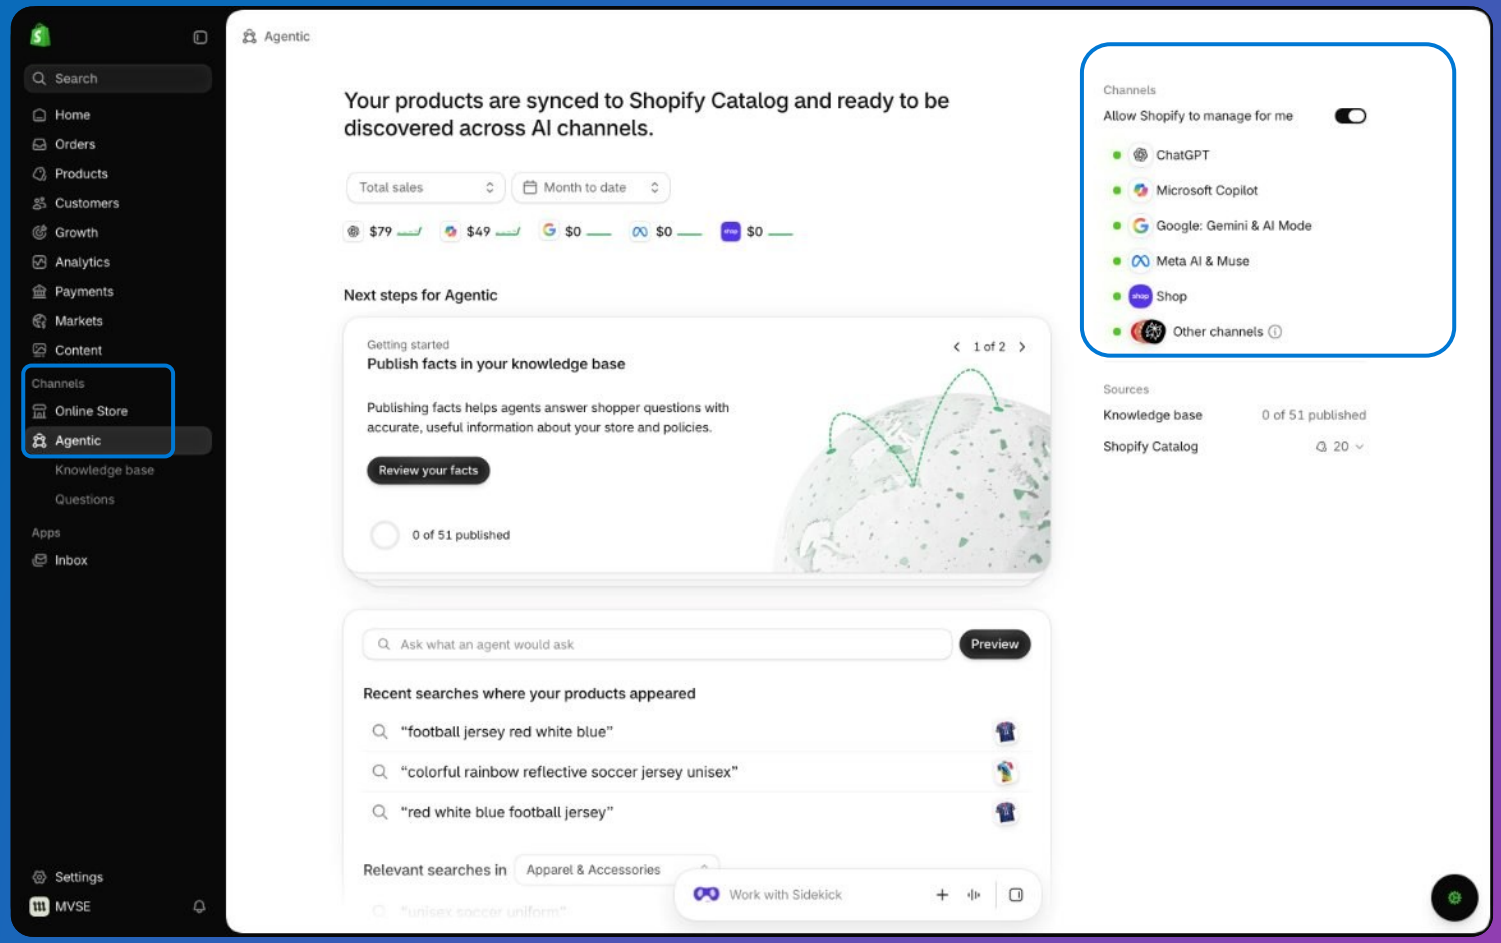

1.8x

higher conversion when Copilot queried the Shopify Catalog

Source: Shopify-shared Copilot data assessing cart additions, checkout initiations, and conversions for sessions with and without connection to Shopify Catalog via Microsoft's catalog API, one-week sample, Sept. 2026.

02

Be chosen

Close the sale with agentic checkout

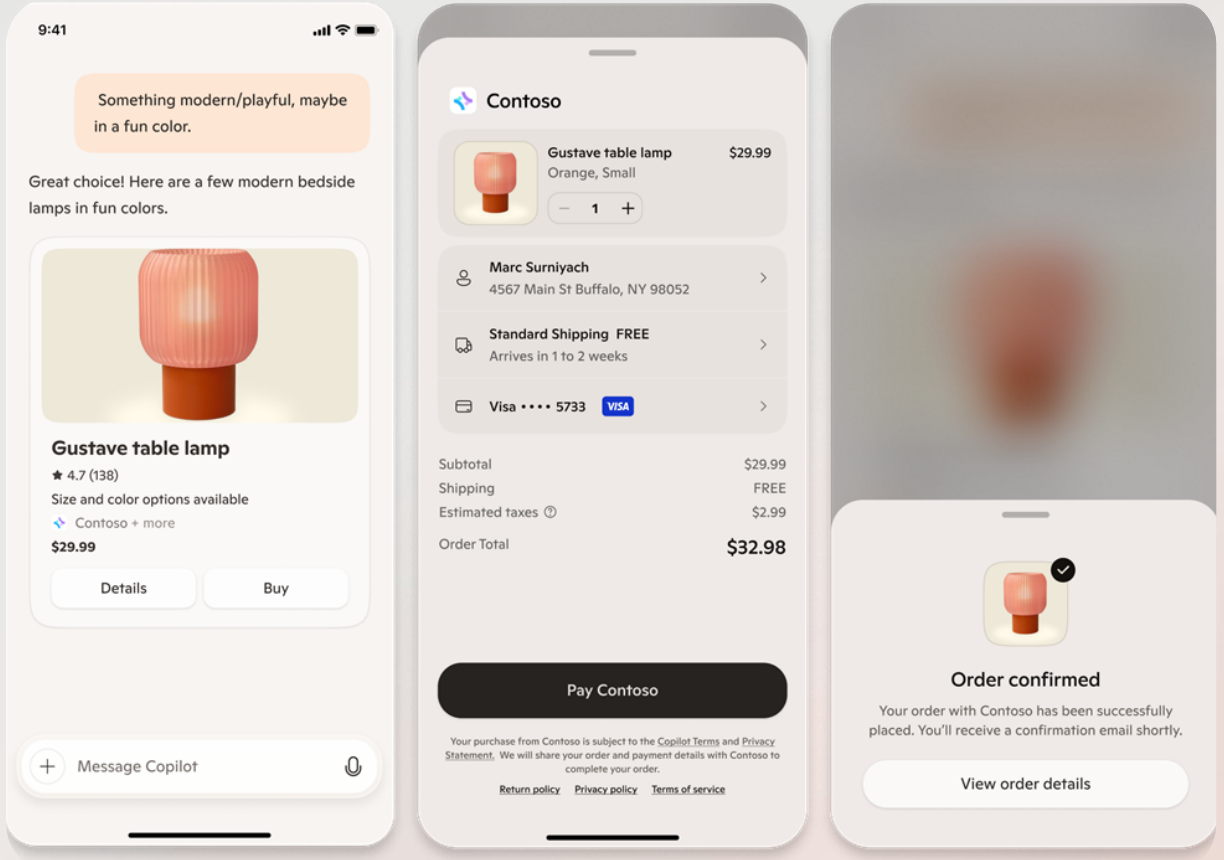

Microsoft Advertising

Copilot Checkout

Turn inspiration into action.
Frictionless flows with no redirects.

- Meet shoppers at the moment they research and decide
- Be the merchant of record in the transaction
- Maintain full ownership of the customer relationship

Microsoft Advertising

Enable Copilot Checkout

Onboarding Paths

PayPal's Store Sync and **Stripe's** Agentic Commerce Suite (ACS) offer turnkey solutions to sell.

Shopify merchants have been automatically enrolled (with controls in Shopify admin). There are no additional onboarding steps required.

Merchant Actions

1. Connect your PSP account
2. Expose products and checkout actions via UCP (often through MMC)
3. Confirm order and fulfillment handoff

03

Understand and optimize

with Clarity

Microsoft Advertising

THE PROBLEM

Most teams still measure clicks and rankings — after the decision is made

Discovery moved upstream
Influence now happens inside AI-generated answers, before a customer ever visits your site.

Traditional analytics can’t see it
Web analytics measures visits after arrival. It can’t explain how AI retrieves and cites content upstream.

Visibility without action
Knowing a citation happened isn’t enough. Teams need to know which gaps to close first.

The post-click blind spot
Problems blamed on targeting, bidding, or creative are often landing-page problems.

AUDIENCE Poll

Can you see today whether AI systems are citing your content?

Thumbs up for yes, thumbs down for no.

THE PLATFORM

A free analytics platform for the AI era of the internet

Clarity shows how AI discovers and represents your business — then shows what customers do after they arrive. **One platform. No cost.**

AI VISIBILITY

How AI finds and cites your brand

— Grounding queries — the questions AI used

— Citations — which pages AI referenced

— Share of authority — your citation share vs. others

+

BEHAVIORAL ANALYTICS

What customers do next

— Session recordings — watch real journeys

— Heatmaps — clicks, scrolls, and focus

— Friction signals — rage clicks and dead clicks

Know where AI finds your brand and where it does not

Microsoft Advertising

HOW AI ANSWERS

How one shopper prompt becomes many queries

Nobody typed these. The assistant ran them on the shopper's behalf.

What the shopper types

"What are the best running shoes for flat feet if I run on pavement?"

Grounding queries the AI runs

- Best running shoes for flat feet
- Stability vs. neutral running shoes
- Cushioning for running on pavement
- Running shoe reviews and ratings
- Best shoe brands for overpronation

What the shopper sees

One clean answer

The brands cited are the ones whose pages answered the hidden searches.

Illustrative example. Brand names and URLs shown are fictional.

WHERE THE CITATIONS LAND

What that looks like in the AI Answers

Each cited page won a different background question — and the gaps are your to-do list.

The answer the shopper sees	Cited page	Won on grounding query
For flat feet on pavement, choose stability shoes with firm midsoles. runwell.com On hard surfaces, a firmer midsole usually beats maximum cushioning. pacelab.com Popular picks include the Road GT and the Trailfirm Stride. roadrunnerreview.com	runwell.com	Best running shoes for flat feet
	pacelab.com	Stability vs. neutral running shoes
	roadrunnerreview.com	Running shoe reviews and ratings

A search a competitor won is a page you owe.

Illustrative example. Brand names and URLs shown are fictional.

WHAT MAKES CLARITY DIFFERENT

Real Data, Not Assumptions

Most tools rely on scraped data and estimates. Clarity shows what's actually being referenced across major AI platforms, based on real citations and the queries behind them.

Microsoft Clarity	Other GEO Tools
✓ Microsoft AI and select partner grounding data	Sampling & estimates
✓ Real query-level data	Inferred from search results and panels
✓ Actual citations in generated responses	Approximated from simulations
✓ Integrated CDN-level data	Limited or separate tooling

Comparison based on publicly available information as of June 2026; competitor names are trademarks of their respective owners.

AI VISIBILITY

AI Visibility, in three reports

Bot activity: Is AI Finding me?

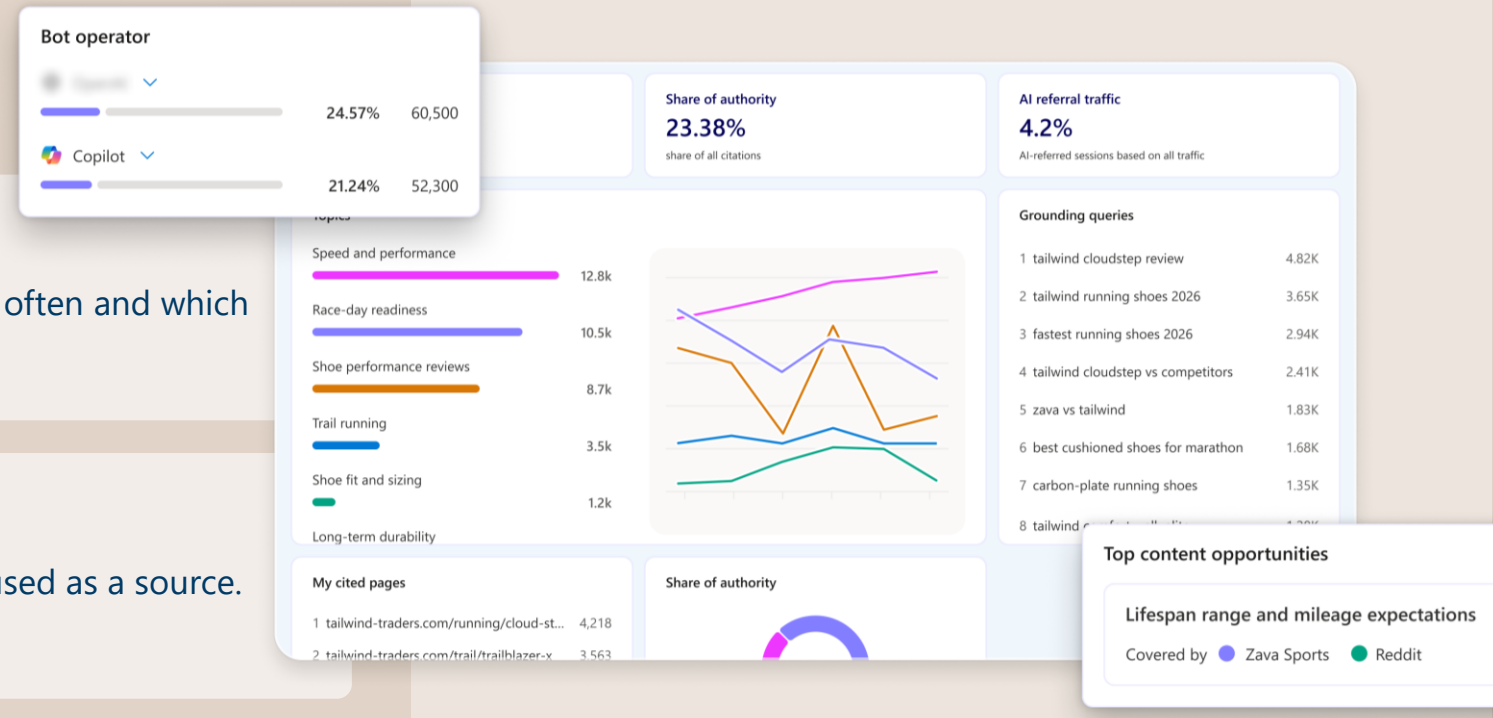

Which AI crawlers reach your site, what they take, and how often and which ones ignore

Citations: How am I showing up in answers?

The grounding queries AI ran, and when your pages were used as a source.

Topic Insights: Where are competitors winning that I am not?

Your own topics, prompts and competitors, with share of authority and recommended actions

Microsoft Advertising

REAL-LIFE EXAMPLE

Alpine Ski House Demo

Microsoft Advertising

Win more ground in AI conversations

SET IT UP PROPERLY

Use your own topics, prompts, and competitors

1

Add your topics

Default topics describe your category. Your topics describe your business: the questions you want to be the answer to.

2

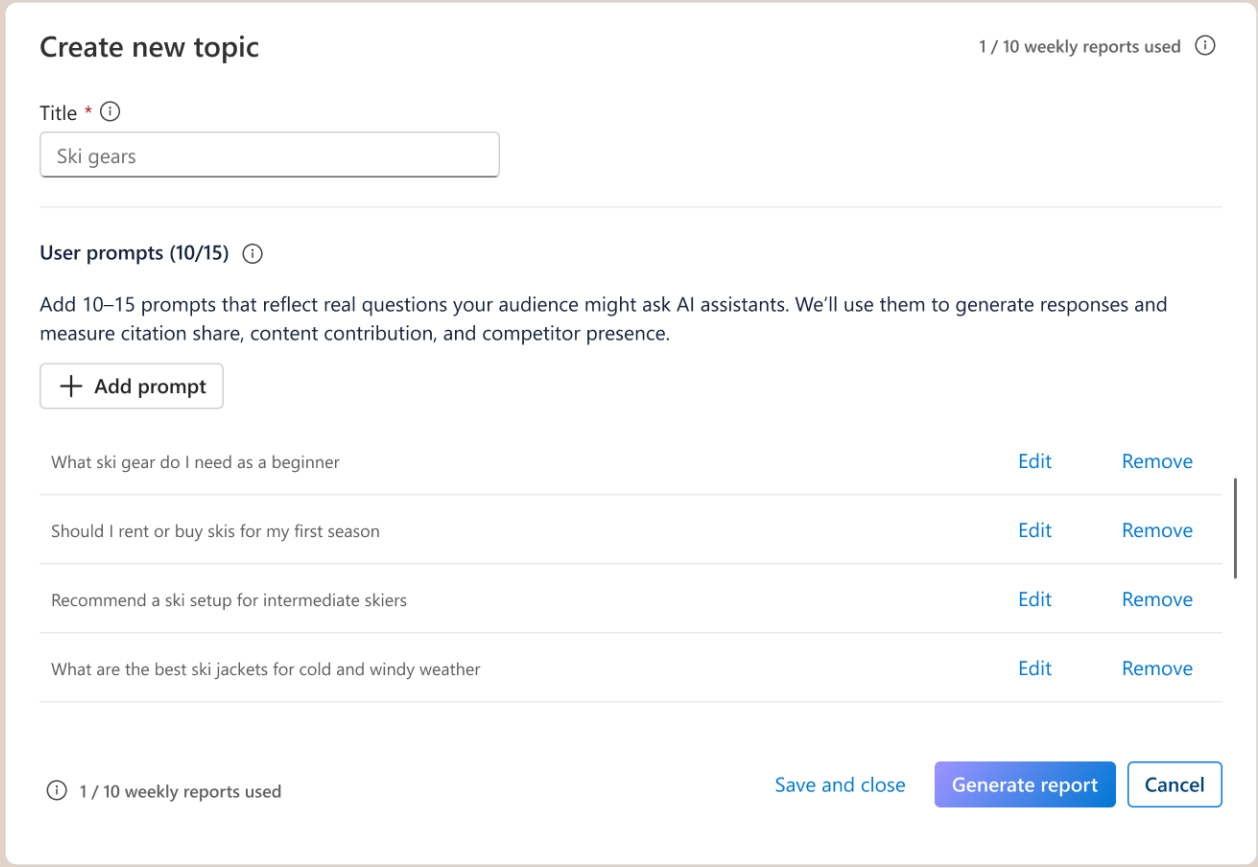

Add your prompts

Write the way customers actually ask. “what are the best waterproof boots for winter?” beats a keyword.

3

Add your competitors

See who AI cites instead of you. Add the brands you actually compete with so Share of Authority reflects your real market.

Microsoft Advertising

See what happens after AI sends you customers

Microsoft Advertising

See how they behave once they're there

See how they engage

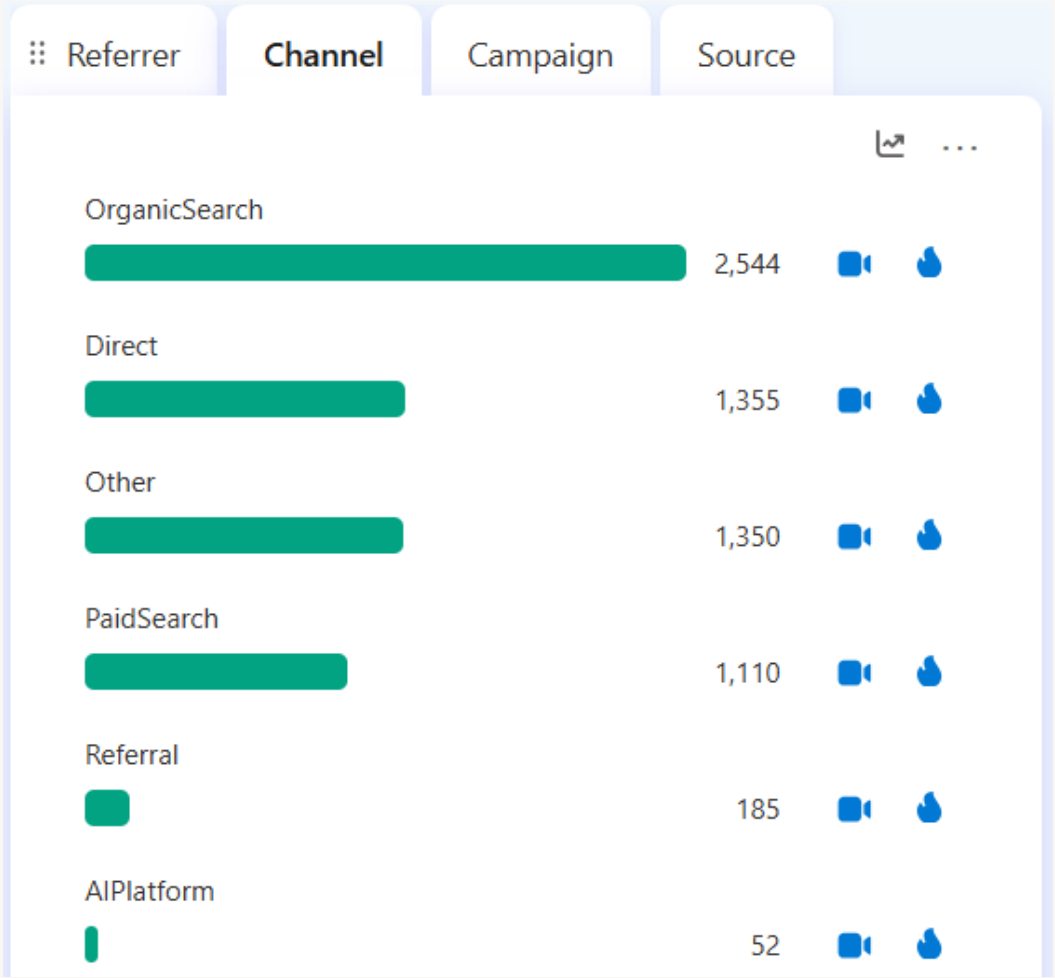

Heatmaps and session replays filtered by source

Ask questions, skip the filters

"Why did mobile conversion drop last week?" Copilot answers.

Compare behavior

Analyze how engagement varies across traffic sources

They arrived ready to buy. Then they left.

Dead clicks in the checkout flow	Visitors clicked "Upload" in the custom boot fitting tool and nothing happened. Repeat clicks, then exit.
Pricing was unclear	"From $49" with the real price behind a configurator. Rage clicks on the price, then exit.
The offer sat below the fold	Free shipping never got seen. Most visitors stopped scrolling before 20% depth on every device.

None of these are traffic problems. All three are page problems.

AI, PAID, ORGANIC, SOCIAL, DIRECT

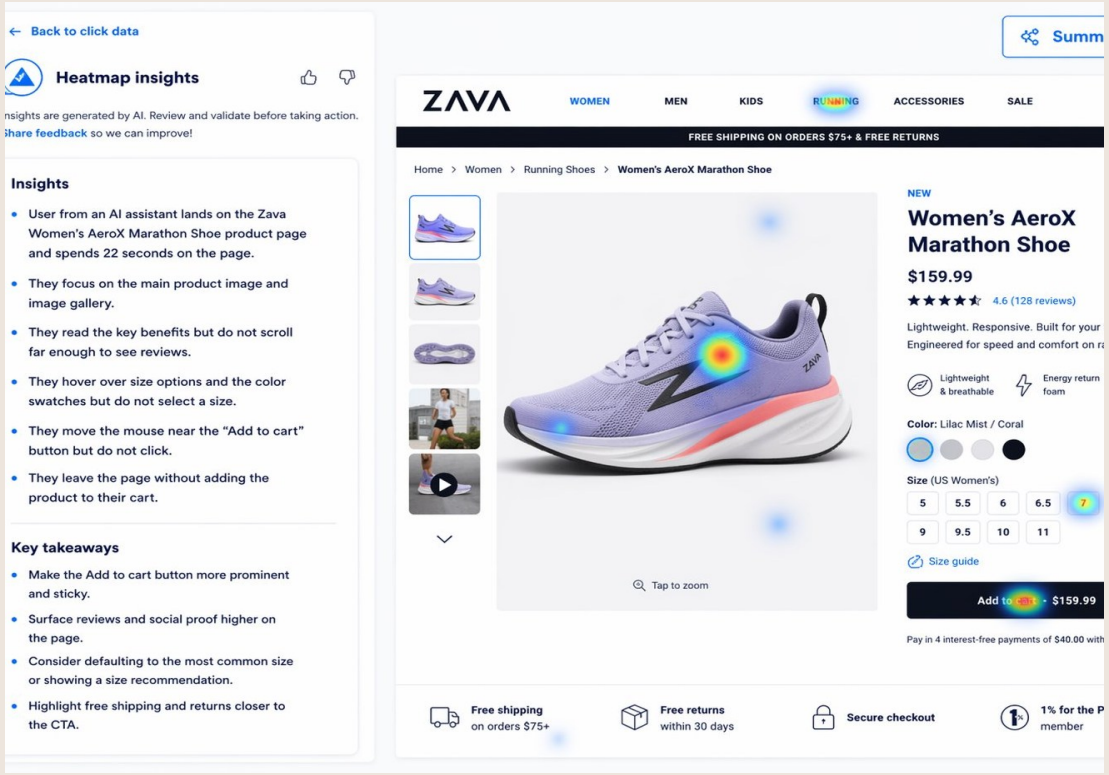

Separate your traffic before you judge it

They behave differently

AI-referred visitors often arrive with the comparison already done, so their journey is shorter and more focused.

So optimize differently

A social visitor needs convincing. An AI visitor usually needs confirming: price, stock, shipping, proof.

Microsoft Advertising

Advertising

Connect your Google and Microsoft ad spend to on-site behavior — without leaving your campaign workspace.

Post-click behavior

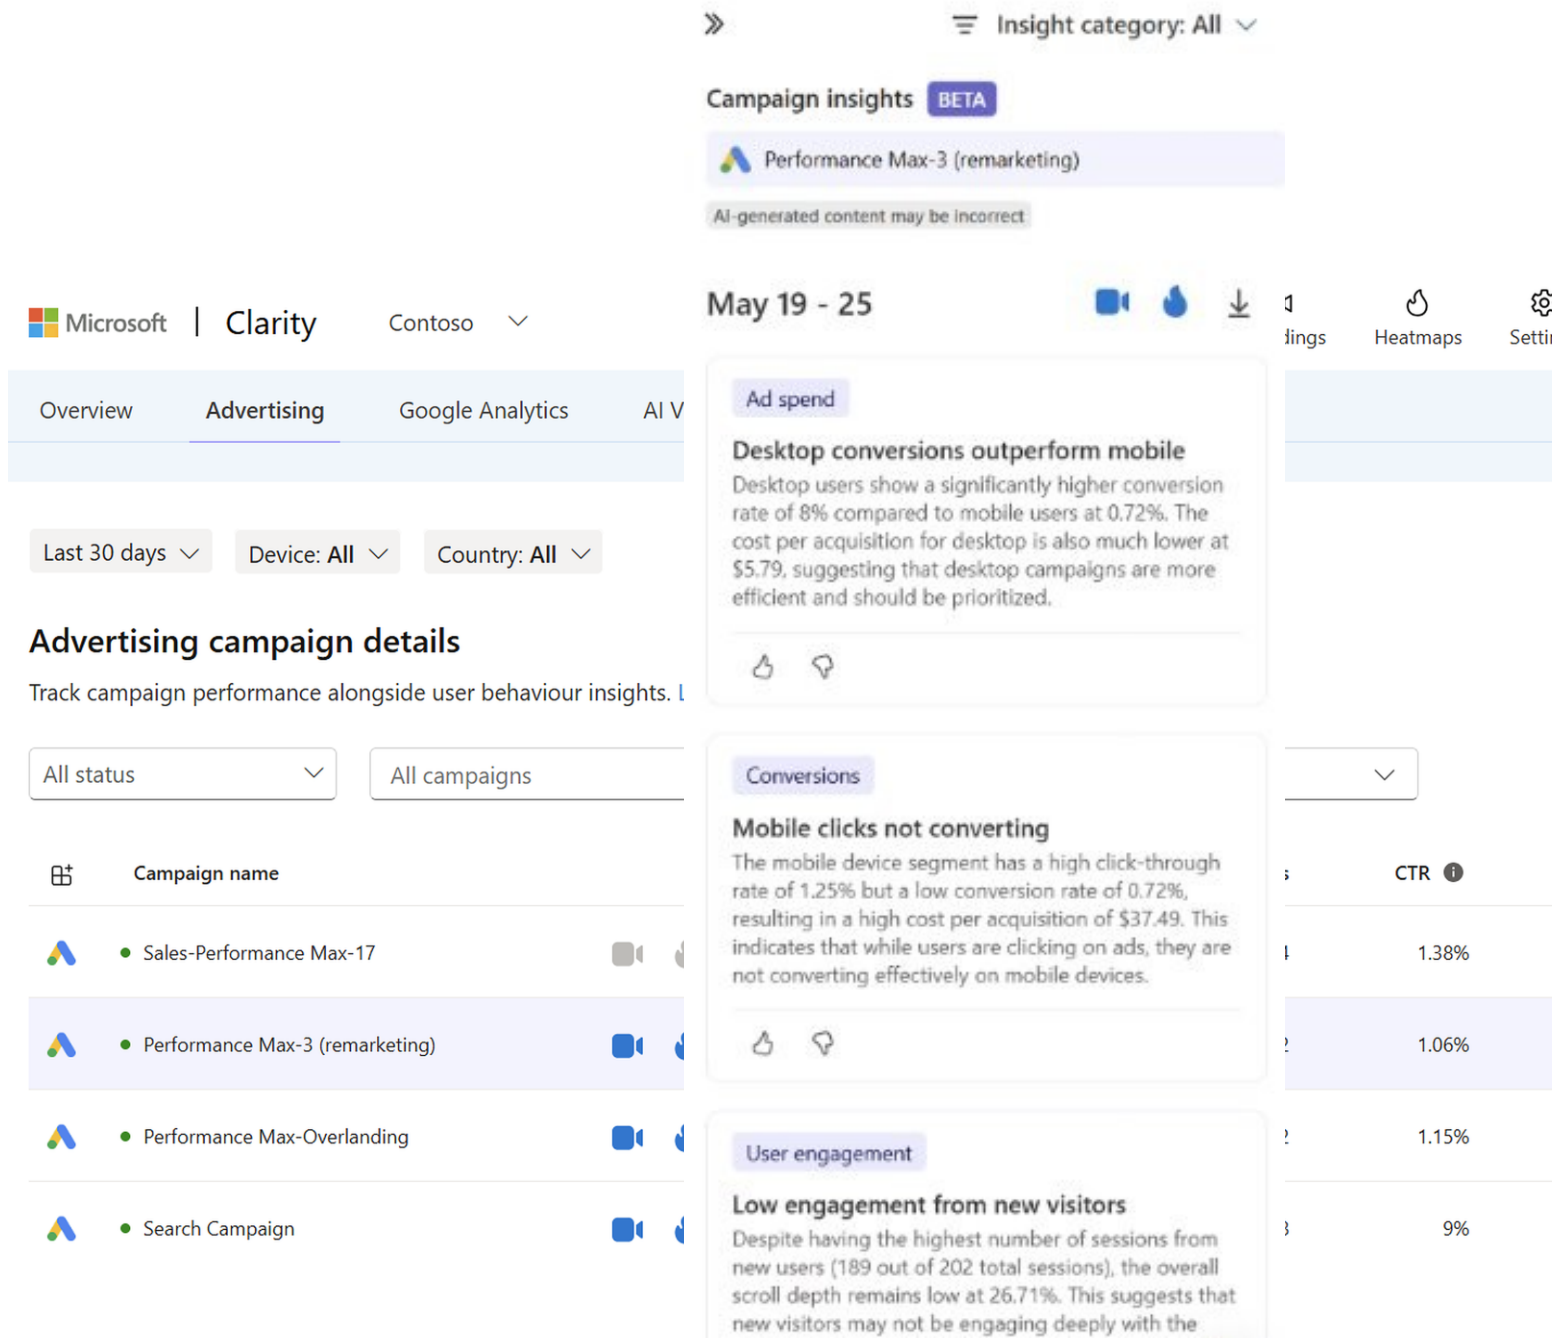

See which campaigns drive engagement, friction, or drop-off — alongside spend and conversions.

Audience insights

Identify high-intent segments by what they actually do on your site after clicking.

Creative diagnostics

Find which ads send rage-clicking, confused visitors — and which send buyers.

Get started

01 Get discovered

- ☐ Share your full product catalog with AI-ready enhancements
- ☐ Show up where shoppers find and evaluate brands, not just search results

02 Be chosen

- ☐ Talk to your payment service provider (Stripe, Shopify, PayPal) to get started with Copilot Checkout, or your Microsoft Advertising team.

03 Understand and optimize

- ☐ See how shoppers behave across AI surfaces
- ☐ Measure and improve your AI commerce performance
